Copy of Circular relating to Registration of Roman Catholic Marriages,	98
 <hr/>	
Index of Superintendent Registrars' Districts, and of Registrars' Districts,	99-105

RE P O R T

TO

His Excellency JOHN POYNTZ, EARL SPENCER, K.G., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

As directed by the provisions of the 26 Vic., cap. 11, sec. 49, the 26 & 27 Vic., cap. 90, sec. 16; and the 7 & 8 Vic., cap. 81, sec. 56, I have the honour to transmit to your Excellency, in order that the same may be laid before Parliament, General Abstracts of the Births, Deaths, and Marriages registered in Ireland during the year 1867.

A General Abstract of the number of Births, Deaths, and Marriages, registered in the year 1867, was presented to Parliament in the Session of 1868. The Report now submitted contains detailed Tables of the ages and condition of persons married, of Births, distinguishing legitimate from illegitimate ; and of Deaths, and their causes.

The Acts for the Registration of Births and Deaths, and Roman Catholic Marriages, came into operation on the 1st of January, 1864, but that for the Registration of Protestant Marriages of all denominations has been in force since the 1st of April, 1845.

For the purposes of Registration, the country has been divided into 163 Superintendent Registrars' Districts—co-extensive with the Poor Law Unions—and into 774 Registrars' Districts, which, with a few exceptions, are of equal extent with the Dispensary Districts formed under the Medical Charities Act.

GENERAL SUMMARY.

The *estimated* population of Ireland in the middle of 1867 was 5,557,196; the persons whose marriages were registered, amounted to 59,484; the number of marriages being 29,742; children born alive whose births were registered, amounted to 144,388; and the number of deaths registered was 93,503. The emigrants from Ireland during the year 1867 amounted to 80,624. In the previous year—1866—there were registered 30,121 marriages, 146,090 births, and 93,027 deaths ; the number of emigrants was 99,467.

MARRIAGES.

29,742 marriages were registered in Ireland during 1867, being in the proportion of 535 marriages to every 100 persons, or of 1 marriage to every 187 persons, of the *estimated* population. The ratio in England was 1 in 113, or 836 per cent., and in Scotland 1 in 140 or 710 per cent. of the estimated population.

755 men and 4,357 women contracted marriage before they had attained their twenty-first year. The proportion of males married under

age was 2·54; of females, 14·65 per cent. The proportions in England and Wales in 1867 were—males, 6·87, and females, 20·17 per cent. In Scotland the proportions were 6·77 males and 20·41 per cent. females.

Of widowers, 3,029, and of widows, 1,627 were re-married; the proportion being 10·18 per cent. of widowers, and 5·47 per cent. of widows, to the total marriages. The like proportions in England and Wales were 14·33 widowers, and 9·65 per cent. widows. In Scotland the proportions were, widowers, 12·33, and widows, 5·65 per cent.

According to the provisions of the Registration Acts, every registry of a marriage is required to be signed by the parties married, two witnesses, and the officiating clergyman. A test of the elementary education of the persons contracting marriage is thus afforded by comparing the number who write their names in the registers, with the number who make a mark. Of 59,484 persons married in 1867, 25,303 (11,086 men and 14,217 women) signed the registers with marks; being in the proportion of 42·5 per cent.—37·3 per cent. of the males, and 47·8 per cent. of the females married.

The like rates in England and Wales for the same year were 21·1 per cent. of males, and 28·8 per cent. of females; and in Scotland 10·59 of males and 20·73 per cent. of females.

The marriage registers contain a column in which the age of each of the parties married is inserted; but as the law only requires it to be stated whether the parties are "of full age" or "minors," the precise age at marriage is not always entered in the registers. In 1867 the exact ages of both parties were given in 12,007 instances. Of these 10,843 were bachelors, and 11,355 spinsters; 1,164 were widowers, and 652 widows. The largest number of wives was married between 21 and 30—the number being 7,442, or more than one-half of the whole number whose ages are recorded. The largest number of husbands—7,375—is also found to have been married between 21 and 30 years of age.

350 bachelors were married to widows, both of whose ages at the time of marriage are recorded. Of these, 188 of the widows and 170 of the bachelors married between 25 and 35 years of age. Of 862 widowers who married spinsters, 381 of the latter were between 25 and 35 years of age; whilst the largest number of the widowers on their re-marriages ranged chiefly between 30 and 45.

Of widowers and widows married, whose ages at the time of marriage are stated, there were 302 couples. Of these the largest number of widows appears to have been between 40 and 50, and of widowers between 50 and 60. 9 widowers and 4 widows were married when they were above 70 years old.

With respect to Roman Catholic Marriages, the 26 & 27 Vic., cap. 90, directs that parties about to contract marriage shall produce to the clergyman celebrating the marriage a certificate, to be procured from the Registrar, filled up as far as possible by that officer with the particulars necessary to be registered, which certificate the parties married, the witnesses, and the officiating clergyman are required to sign. When so filled up the certificate is to be returned within three days to the Registrar by the husband, under a penalty of ten pounds.

With a view to facilitate the registration of marriages under the Act referred to, and at the special request of several dignitaries of the Roman Catholic Church,—with the approval of the Law Officers of the Crown—(who at that time were the Right Hon. Thomas O'Hagan, M.P., and James

A. Lawson, esq., Q.C.)—I instructed the District Registrars to furnish to each parish priest, who should apply for them, forms of certificate to be duly filled, signed, and forwarded to the Registrar on the occasion of a marriage, thus saving the husband the inconvenience of procuring from the Registrar a form of certificate previous to his marriage, as required by the Statute.* I also furnished all the Roman Catholic clergy in Ireland with copies of the Act above referred to, in order that the requirements of the law might be known to them previous to coming into operation.

The proportions per cent. of marriages to the estimated population, and of persons married who wrote their names in the registers; also of minors, widowers, and widows, are given in the following table, for the several registration divisions:—

TABLE I.—*The Proportional Number of Marriages in the Eight Divisions of Ireland during the years 1864, 1865, 1866, and 1867, of Persons who Signed their Names, of Persons not of Full Age, and of Re-marriages.*

The extent and position of each of these divisions are specified at page xxxvi.

* For copy of Circular issued on this subject, see page 98.

Of the total number of marriages registered (29,742) 20,977 were celebrated by Roman Catholic clergymen, and entered in the register books by the Registrars in accordance with the 26th and 27th Vic., cap. 90; and 8,765 marriages were of members of the various Protestant persuasions. Of the latter marriages 4,992 were in churches and chapels of the Established Church, 2,674 in Presbyterian Meeting-houses, 206 in "Registered Buildings," 877 in the Registrars' offices, 13 according to the usages of the Society of Friends, and 3 marriages were of members of the Jewish persuasion. Of the entire number of marriages in 1867 there were contracted in the quarter ending the last day of March, 12,828; of June, 5,155; of September, 5,486; of December, 6,273.

The following table gives a statement showing in continuation of the return in my report for 1866, the number of marriages solemnized in Ireland under the Marriages Act of 1844, distinguishing the mode of celebration:—

TABLE II.—*The Number of Marriages registered under 7 & 8 Vic., c. 81, in each Year, from 1st April, 1845, to 31st December, 1867, and the Mode in which the Marriages were solemnized.*

There is not any return made to me of the places of worship belonging to Roman Catholics in which marriages are celebrated; but under the

* The 7 & 8 Vic., c. 81, came into operation 1st April, 1845.

provisions of the 7th & 8th Vic., cap. 81, I am enabled to state respecting other religious persuasions, that there were 1,471 Churches and Chapels of the Established Church, 580 registered Presbyterian Meeting-houses, and 209 Registered Buildings belonging to various denominations, in which marriages might lawfully be solemnized, on the 31st December, 1867. During the year 1867 there was an increase of 13 in the number of such places in the Established Church; and of 15 in other religious communities. The "Registered Buildings" belong to the following denominations:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	114	Methodists New Connexion,	5
Reformed Presbyterians,	34	Church Methodists,	1
Independents,	20	Covenanters,	1
Baptists,	12	Evangelical Union,	1
Seceders,	11		
United Presbyterians,	5	Total,	209
Moravians or United Brethren,	5		

The following Table shows by Divisions and Registrars' Districts the number of places of worship in which marriages (under the 7 & 8 Vic., cap. 81), may be solemnized in each District or Union, distinguishing the religious denominations:—

During the year 1867 there were issued by the Registrars, 728 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1867.	Number of Registered Meeting-houses on 31st December, 1867.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland.	114	540	2,597
2. Remonstrant Synod of Ulster, . . .	8	21	44
3. Presbytery of Antrim, . . .	4	10	35
4. United Presbytery or Synod of Munster, . . .	4	4	—
5. Northern Presbytery of Antrim, . . .	1	5	10
Total, . . .	131	580	2,686.

BIRTHS.

The births registered in Ireland during 1867, amounted to 144,388. Of these, 74,832 were males, and 70,056 females, being in the proportion of 106·1 boys to every 100 girls. In England, in the same year, the number of males to 100 females whose births were registered was 104·3; and in Scotland 105·4.

The rate per cent. of births to the *estimated* population was 2·598. In England the rate was 3·585, and in Scotland 3·593.

There were 4,714 illegitimate births, of which 2,409 were those of males, and 2,305 females; the proportion to the total number of births being 3·3 in every 100. The rate in England was 5·9, and in Scotland 9·7 per cent. The highest rates, 5·7 and 4·5, of illegitimate children in every 100 born, occurred in the North-Eastern and South-Eastern Divisions respectively.

The following table shows the proportion of legitimate and illegitimate births registered in each of the eight Divisions in 1864, 1865, 1866, and 1867.

TABLE IV.—*The Per-cent-age of Legitimate and Illegitimate Births registered in Ireland during the years 1864, 1865, 1866, and 1867, by Divisions.*

Divisions.	Proportion per cent. of Legitimate Births.				Proportion per cent. of Illegitimate Births.			
	1864.	1865.	1866.	1867.	1864.	1865.	1866.	1867.
IRELAND,	96·2	96·3	96·7	96·7	3·8	3·7	3·3	3·3
North-Eastern,	93·8	93·6	94·3	94·3	6·2	6·4	5·7	5·7
North-Western,	96·4	96·8	96·7	97·1	3·6	3·2	3·3	2·9
Eastern,	96·6	96·9	97·3	97·2	3·4	3·1	2·7	2·8
North Midland,	97·3	97·5	97·8	97·7	2·7	2·5	2·2	2·3
South Midland,	95·7	96·4	96·2	96·3	4·3	3·6	3·8	3·7
Western,	98·1	98·3	98·6	98·8	1·9	1·7	1·4	1·2
South-Eastern,	94·9	94·8	95·4	95·5	5·1	5·2	4·6	4·5
South-Western,	97·6	97·5	97·7	98·0	2·4	2·5	2·3	2·0

37,637 births were registered during the quarter ended 31st March; 40,063 in that ended 30th June; 34,192 during that ended 30th September; and 32,496 in that ended 31st December.

DEATHS.

The deaths registered in 1867 amounted to 93,503—46,945 males, and 46,558 females—being in the proportion of 1·683 per cent. of the *estimated* population, or in the ratio of 1 registered death to every 59 persons. The proportion in England for the same year was 2·198 per cent., or 1 in 45; and in Scotland 2·177 per cent., or 1 in 46.

The following table shows the per-cent-age of mortality at different ages:—

TABLE V.—*The Mortality per Cent. at each Age-period, according to the Registration of Deaths in Ireland, during the Years 1864, 1865, 1866, and 1867, by Sexes.*

Sexes.	AGES.												
	0—	5—	10—	15—	25—	35—	45—	55—	65—	75—	85—	95 and upwards.	
Males,	1864	28·65	4·28	2·32	7·57	6·19	5·78	7·76	11·51	12·30	10·11	2·97	.61
	1865	29·13	4·51	2·32	7·58	6·38	5·88	7·76	10·76	12·44	9·62	3·04	.58
	1866	27·99	4·84	2·46	7·16	6·68	5·91	7·84	10·93	12·26	10·16	3·19	.58
	1867	27·57	3·71	2·17	6·84	6·56	5·46	7·68	11·54	13·58	10·71	3·48	.70
Females,	1864	25·20	4·28	2·37	6·90	6·55	6·03	7·80	11·81	13·74	11·23	3·86	.73
	1865	25·89	4·62	2·41	7·07	6·64	6·13	7·84	11·24	13·62	10·53	3·25	.76
	1866	24·11	4·56	2·51	7·12	7·03	6·45	7·62	11·45	13·61	11·16	3·55	.83
	1867	24·04	3·72	2·34	6·56	6·58	5·90	7·31	11·69	14·96	12·00	4·05	.90
Males and Females,	1864	26·92	4·25	2·34	7·24	6·37	5·91	7·78	11·66	13·02	10·68	3·16	.67
	1865	27·50	4·57	2·37	7·32	6·51	6·00	7·80	11·00	13·03	10·08	3·15	.67
	1866	26·03	4·70	2·49	7·14	6·86	6·18	7·73	11·19	12·94	10·66	3·37	.71
	1867	25·81	3·71	2·25	6·70	6·55	5·68	7·50	11·62	14·27	11·35	3·76	.80

Of the persons whose deaths were registered during the year 25·81 in every 100 were children under 5 years old—of whom 27·57 per cent. were males, and 24·04 per cent. females. 14·89 per cent. of the men, and 16·95 per cent. of the women, whose deaths were registered had passed their 75th year. 70 of the males and 90 of the females in every 10,000 were stated in the returns to have been over 95 years of age.

EMIGRATION.

During the year 1867 the number of emigrants who left the ports of Ireland amounted to 80,624; of these 45,215 were males and 35,409 females. Of the whole number, 16,027 were from Leinster; 25,268 from Munster; 18,164 from Ulster; and 9,752 from Connnaught: 11,413 persons did not state the county or province to which they belonged.

Of the emigrants in 1867, 13·5 per cent. were under 15 years of age; 74·0 per cent. were 15 to 35 years old; 11·4 per cent. were 35 and upwards; and the ages of 1·1 per cent. were not specified in the returns.

METEOROLOGY.

The following is an abstract of the meteorological observations taken during the year 1867, at the Ordnance Survey Office, Phoenix Park, Dublin, furnished by Major Wilkinson, R.E., by direction of the Superintendent of the Ordnance Survey.

The barometer was highest during the year at 9.30 P.M., on 2nd March, when it stood at 30·796 inches, the air being calm; it was lowest on 7th January, at 9.30 P.M., with the wind at S.W., when it was 28·597 inches.

The highest temperature in the air was 79·6°, on 14th August, and the lowest was 4·6°, on 3rd January.

Rain or snow fell on 201 days. The greatest rain-fall in 24 hours was 9·06 in., on 15th July, with wind blowing S.W. The total amount registered was 24·050 inches.

The prevailing wind was from the W., from which point it blew on 92 days; it was from S.W. on 71 days; from N.W. on 47 days; from S. on 30 days; from S.E. on 31 days; from E. on 37 days; from N.E. on 14 days; and from N. on 21 days, at 9.30 A.M. On 22 days the air was calm at that hour. The total pressure of the W. wind was 346·25 lbs., being an average of 3·76 lbs. per square foot. The strongest wind blew from W. on the 6th February, when the pressure was 25 lbs. per square foot.

Mean,	29.965	29.949	29.961	1.264	

I beg here to repeat the observations made in my former Reports to your Excellency, with respect to the working of the Acts for the Registration of Births, Deaths, and Marriages in Ireland, as I regret to state that the numbers of these events registered in 1867 do not show much improvement compared with previous years:

"In several instances prosecutions have been resorted to with some advantage; but notwithstanding the exertions made to induce a general compliance with the law throughout the country, numerous cases of neglect to register births and deaths have been reported to me by the District Registrars, but frequently at too late a period after their occurrence to allow of the parties being proceeded against at the Petty Sessions.

"I regret to add that the registration of marriages under the 26th & 27th Vic., cap. 90, is not at all satisfactory in some Districts, owing to the Clergy who have celebrated the marriages having declined to sign the necessary certificates.

"The marriages solemnized under the provisions of the 7th & 8th Vic., cap. 81, which came into operation in 1845, are, I believe, all registered.

"The following are the ratios of Births, Deaths, and Marriages to population in different countries compared with the ratio in Ireland in 1864 [and in 1865, 1866, and 1867] :-

COUNTRIES.	RATIO TO POPULATION.		
	Births.	Deaths.	Marriages.
IRELAND [in 1864],	1 in .42	1 in .61	1 in 207
IRELAND [in 1865],	1 " .39	1 " .61	1 " 183
IRELAND [in 1866],	1 " .38	1 " .60	1 " 185
IRELAND [in 1867],	1 " .38	1 " .59	1 " 187
England,	1 " .28	1 " .42	1 " 116
Scotland,	1 " .28	1 " .42	1 " 137
Sweden,	1 " .30	1 " .50	1 " 145
Prussia (Old Provinces), . . .	1 " .24	1 " .38	1 " 116
Hanover,	1 " .30	1 " .44	1 " 124
Wurtemburg,	1 " .23	1 " .31	1 " —
Hanse Towns: Bremen,	1 " .28	1 " .37	1 " 105
Holland,	1 " .30	1 " .42	1 " 127
France,	1 " .38	1 " .44	1 " 127
Spain,	1 " .26	1 " .32	1 " 127
Austria (exclusive of Hungary), . .	1 " .25	1 " .31	1 " 121

"It will be seen from the foregoing figures, compiled from the Statistical Tables published by the Board of Trade, how incomplete was Registration in Ireland in 1864, and comparing the number of Births, Deaths, and Marriages recorded in that year with those since annually registered, I regret to state that there appears but little improvement in the subsequent years:—

	1864.	1865.	1866.	1867.	1868.
Registered					
Births,	136,414	144,970	146,090	144,388	146,108
Deaths,	93,144	93,154	93,027	93,503	86,803
Marriages,	27,406	30,802	30,121	29,742	27,753."

Following this Report are summaries of the Quarterly Reports issued in 1867; and the Appendix contains a letter addressed to me by Dr. Burke, the Superintendent of Medical Statistics, respecting the causes of death—to which I beg to refer.

I have the honour to be

Your Excellency's

Very faithful servant,

WILLIAM DONNELLY,

Registrar-General.

GENERAL REGISTER OFFICE,

Dublin, September 3rd, 1870.

Quarterly Reports.

First Quarter.

SUMMARY OF THE QUARTERLY REPORTS, 1867.

First Quarter—January, February, March.

Marriages.—There were 12,828 marriages registered in Ireland during the first quarter of 1867, affording an annual ratio of 1 in every 108, or .923 per cent. of the *estimated* population. Of this number 10,655 were between Roman Catholics, representing a ratio of 1 marriage in every 101, or .987 per cent. of Roman Catholics, and 2,173 were between Protestants, affording a ratio of 1 in every 142, or .703 per cent. of the Protestant population. The number of marriages registered in the corresponding quarter of 1866 was 11,992, and in the first quarter of 1865 it was 12,308.

Births.—The births registered during the first quarter of the year 1867 amounted to 37,637—19,313 boys and 18,324 girls—affording an annual ratio of 1 in every 36·9, or 2·71 per cent. of the *estimated* population. The average number of births registered during the corresponding quarter of the previous three years was 36,167.

Deaths.—There were 30,411 deaths—15,007 males, and 15,404 females—registered during the quarter, affording an annual ratio of 1 in 45·7, or 2·19 per cent. of the *estimated* population. The average number registered during the first quarter of the preceding three years was 28,305.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st March, 1867, amounted to 14,033—8,698 males and 5,335 females—being 11,776 less than the number who emigrated during the corresponding quarter of 1866, when the number amounted to 25,809. The number in the first quarter of 1865 was 15,848, and in the corresponding quarter of 1864 it was 27,625.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 31st March 1867, being 37,637; the deaths 30,411; and the number of emigrants 14,033 (according to the returns obtained by the enumerators at the several seaports);—a decrease of 6,807 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

It will be seen from the following that the prices of provisions were much higher during the first quarter of 1867, than they were in the corresponding quarter of 1866, and that there was a considerable increase in the number of persons receiving Poor Law relief.

The average price of Messrs. Manders and Co.'s 4 lb. loaf for the first quarter of 1867 was 8d., being three halfpence higher than the average for the corresponding quarter of 1866. The price was 8d. during the first eight weeks of the quarter, and 7½d. during the last five weeks.

The average price of oatmeal for the first quarter of 1867 was 16s. 1d. per cwt., against 14s. 10d. for the corresponding quarter of 1866. The average prices of potatoes per cwt. at the Dublin Potato Market ranged from 4s. 5d. to 5s. 7d., being much higher than for the corresponding quarter of 1866, when the prices ranged from 2s. 6d. to 3s. 6d.

The weekly average prices of beef at the Dublin Cattle Market for the quarter ranged from 53s. to 70s. per cwt., against 50s. 6d. to 63s. 6d. for the corresponding quarter of the previous year.

The average number of persons receiving indoor relief in the Irish work-houses during the first quarter of 1867 was 58,503, against 57,123 for the corresponding quarter of 1866; the greatest number (59,634) was on Saturday, the 9th February; on the corresponding day of the previous year there were but 57,573; the lowest number was on Saturday, the 5th January, the number amounting to 55,359, against 54,894 on the corresponding day in 1866.

The average weekly number of persons receiving outdoor relief was 16,489, against 11,927 for the first quarter of 1866.

Of the persons receiving indoor relief during the first quarter of 1867 an average number of 429 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 465.

THE WEATHER.

The mean height of the barometer at the Ordnance Survey Office, Phoenix Park, Dublin, during the first quarter of 1867 was 29.642 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29.521 inches, 29.651 inches, and 29.725 inches respectively); the highest reading (30.613 inches) was on the 2nd March, at 9.30 P.M., when the air was calm, and the lowest (28.414 inches) on the 7th January, at 9.30 P.M., wind S.W.

The mean temperature of the air during the quarter was 39.9° (it was 41.5°, 38.9°, and 40.2°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (59.5°) was on the 24th March, and the minimum (4.6°) was on the 3rd January.

Rain or snow fell on 60 days during the quarter. The rain-fall measured 8.188 inches; in the first quarter of 1866, 1865, and 1864 it was 7.508 inches, 5.979 inches, and 5.227 inches respectively. The greatest monthly rain-fall was in March, when 3.744 inches were registered.

There was a prevalence of westerly winds, the wind having been from that point on 24 days; on 14 days from S.W.; 5 days from N.W.; 17 days from E.; 11 days from S.E.; 4 days from N.E.; 6 days from N., and 1 day from S., at 9.30 A.M. It was calm on 8 days at that hour.

HEALTH OF THE PEOPLE.

During the first three months of each year the mortality is greater than at any other period. In the first quarter of the year 1867 the deaths were 2,797 in excess of the number registered during the corresponding period of 1866.

As very many of the Registrars throughout the country stated that their districts had been comparatively free from epidemic diseases, the high death-rate must be, in a great measure, referred to the extreme severity of the season.

The old and those of tender years suffered much. To bronchitis and other affections of the respiratory organs, very many of the deaths were attributable.

Out of 79 deaths registered in the Dromore District, Banbridge Union, the Registrar stated, "There were altogether nearly 60 deaths caused directly or indirectly by diseases of the respiratory organs, owing, no doubt, to the unusual severity of the weather."

The Registrar of the Moneymore District, in the Superintendent Registrar's District of Magherafelt, observed that, "During the quarter the number of very aged people who died was unprecedented; their ages ranged from 103 down to 80 years; this is to be attributed to the scarcity of fuel."

Deaths from a very malignant form of fever were reported from a few Districts. This form of fever has at the hands of physicians received various designations, such as "purpura maligna," "febris nigra," "malignant typhus," and lastly, "malignant purpuric fever."

The Registrar of the Rathcoole District, Celbridge Union, reported that "There was one case of malignant fever, or as it has been termed, *black death*, which I am happy to state survives, but with complete loss of vision." One case of "black typhus" occurred in the Tullamore District, which proved rapidly fatal; and in the Mitchelstown District, Mitchelstown Union, the Registrar says, "One case of 'febris nigra' is recorded; the patient was a young girl in the prime of life; she lived but thirty-two hours."

Quarterly Reports.

Scarlatina prevailed in certain districts, but not at all to the same extent as in the first quarter of 1866.

First Quarter. The Registrar of the Riverstown District (Sligo Union) reported that "A most malignant form of scarlatina appeared in the district within the last five weeks, fatal in every case—in all 6 ; happily there has been no new case for the last three weeks."

The Registrar of the Cavan District (Cavan Union) reported 2 deaths from scarlatina, and no less than 20 from measles; and in the Belturbet District of the same union, the Registrar noted the prevalence of measles, which he characterized as the "Rubeola nigra."

In the Kells District, Kells Union, the Registrar reported 13 deaths from cholera. The Registrar of the Street District, Granard Union, stated that "There were 28 cases of cholera morbus, of which 11 proved fatal. There was a strong likelihood of the extension of the epidemic, but this was counteracted by sanitary and charitable measures." One death from Asiatic cholera occurred in the Carrickbyrne District, New Ross Union.

The satisfactory manner in which the provisions of the Compulsory Vaccination Act are carried out, may be inferred from the fact that the only reference to small-pox in the Registrars' notes occurs in that of the Registrar of the Claremorris District (Claremorris Union), who stated that "There has been registered 1 death from small-pox, the subject of which *had not been vaccinated*. In the quarter I have had occasion to notice 2 cases in which *infants vaccinated in 1865 have been exposed to the influence of small-pox, sleeping in same bed with children so affected and have completely escaped*."

Though some of the Registrars reported on the improved sanitary condition of their districts, there were many who complained bitterly of the wretched condition of their districts. In Mullingar, where the deaths nearly doubled the births (68 of the latter against 121 of the former), the very zealous Registrar made the following statement:—"I beg to call attention to the great mortality in the Mullingar Dispensary District during the last quarter; 24 of the deaths *registered* were from cholera. . . . The increasing mortality in this town loudly calls for attention; the number of deaths registered during the year 1866 was 338, and the number now registered for the quarter ending March 31st, is 121! This is a death-rate that something should be done to check. I have frequently reported on the fearfully unhealthy state of this town from the want of sewers. The Town Commissioners here will do nothing; the Poor Law Commissioners have reported to Government with a view to getting the present sanitary laws enforced, *but nothing has been done*."

The benefits resulting from sanitary improvements were well illustrated in the condition of the Milltown Malbay District, Ennistimon Union, which afforded a striking contrast when compared with Mullingar. The Registrar of Milltown Malbay recorded 70 births against 30 deaths, and made the following observations:—"Dependent on its improved sanitary condition, my district enjoys an immunity from disease epidemic or endemic. Nothing can be more marked than the difference betwixt it and the preceding quarters of the same season, when unhappily less preventive measures existed."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS

Into which Ireland has been divided for Statistical purposes.

Marriages.—The Western Division had the greatest number of marriages registered in proportion to its population during the first quarter of 1867, the annual ratio afforded being 1 in 73. The South-Western Division ranked second, with a ratio of 1 in 75. The North-Eastern and Eastern Divisions had the lowest ratios, the number of marriages registered in the former being only equal to an annual ratio of 1 in 152, and in the latter to 1 in 161.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the FIRST quarter of the years 1865, 1866, and 1867, is shown in the following Statement:—

Quarterly Reports.
First Quarter.

[Quarter ending 31st March.]

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 74	South-Western,	1 in 77	Western,	1 in 73
2. Western,	84	Western,	81	South-Western,	75
3. South-Eastern,	100	South-Eastern,	117	South-Eastern,	101
4. North Midland,	130	North-Western,	125	North-Western,	118
5. North-Western,	138	North-Eastern,	147	South Midland,	122
6. South Midland,	139	North Midland,	155	North Midland,	133
7. North-Eastern,	158	South Midland,	157	North-Eastern,	152
8. Eastern,	170	Eastern,	165	Eastern,	161

Births.—The North-Eastern and South-Western Divisions had the highest birth-rate during the quarter ending 31st March, 1867, the annual ratio afforded being 1 in 33. The latter Division afforded the highest birth-rate in the corresponding quarter of each of the years during which the Registration Act has been in force. The South Midland Division, which ranked third for the first quarter of 1864, has had the lowest birth-rate in the corresponding quarter of the three succeeding years.

The numerical order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the FIRST quarter of 1865, 1866, and 1867, is shown in the following Statement:—

[Quarter ending 31st March.]

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. South-Western,	1 in 33	South-Western,	1 in 30	North-Eastern,	1 in 33
2. North-Eastern,	34	North-Eastern,	32	South-Western,	33
3. South-Eastern,	37	Western,	35	Western,	36
4. Eastern,	37	South-Eastern,	36	North-Western,	40
5. Western,	38	Eastern,	37	Eastern,	40
6. North-Western,	40	North-Western,	37	South-Eastern,	40
7. North Midland,	41	North Midland,	39	North Midland,	41
8. South Midland,	42	South Midland,	41	South Midland,	44

Deaths.—The Eastern Division, as usual, had the highest death-rate. The South-Eastern ranked second, and the North-Eastern third. The Western and North-Western had the lowest death-rate during the quarter, the annual ratio afforded by the number of deaths registered being, respectively, 1 in 61 and 1 in 62 of the estimated population.

The following statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the FIRST quarter of 1865, 1866, and 1867:—

[Quarter ending 31st March.]

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 40	Eastern,	1 in 41	Eastern,	1 in 36
2. South-Eastern,	42	North-Eastern,	44	South-Eastern,	37
3. North-Eastern,	44	South-Eastern,	45	North-Eastern,	44
4. South Midland,	51	South-Western,	52	South-Western,	46
5. South-Western,	51	South Midland,	54	South Midland,	46
6. North Midland,	54	North Midland,	59	North Midland,	48
7. North-Western,	55	North-Western,	60	Western,	61
8. Western,	61	Western,	64	North-Western,	62

Quarterly Reports.

First Quarter.

PROVINCES.

Marriages.—Grouping the Unions or Superintendent Registrars' Districts by Provinces, it will be observed from the following table that there were 2,872 marriages registered in the province of Connaught during the first quarter of 1867, affording an annual ratio of 1 marriage in every 76 of the population; and in Munster 4,647, affording a ratio of 1 in 79; whereas in Ulster the ratio was only 1 in 149; and in Leinster, 1 in 155. As has been remarked in former reports, the first quarter of the year is much the most favoured by the Roman Catholic population for marriage; this fact accounts for the great difference between the marriage-rates in Connaught and Munster, and those in Ulster and Leinster.

The following Table shows, by PROVINCES, the number of Marriages registered during the FIRST quarter of the years 1865, 1866, and 1867; together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ending 31st March;					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	2,197	1 in 158	2,008	1 in 171	2,213	1 in 155
MUNSTER,	4,564	„ 81	4,249	„ 87	4,647	„ 79
ULSTER,	3,025	„ 155	3,143	„ 148	3,096	„ 149
CONNAUGHT,	2,522	„ 88	2,592	„ 84	2,872	„ 76
TOTAL,	12,308	1 in 115	11,992	1 in 116	12,828	1 in 108

Births.—Of the 37,637 births registered in Ireland during the first quarter of 1867, 8,088 occurred in Leinster, affording a ratio of only 1 in 42 of the estimated population. In Munster the number registered was 10,328; in Ulster, 13,047; and in Connaught, 6,174. In each of the three last-named provinces, the annual ratio afforded was 1 in 35 of the estimated population.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the FIRST quarter of the years 1865, 1866, and 1867, together with the ratio to the estimated Population.

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 31st March;						Quarter ending 31st March;					
	1865.		1866.		1867.		1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	8,960	1 in 39	8,877	1 in 39	8,088	1 in 42	8,125	1 in 43	7,829	1 in 44	8,898	1 in 39
MUNSTER,	10,566	35	11,208	33	10,328	35	7,486	50	6,931	53	8,153	45
ULSTER,	13,048	36	13,569	31	13,047	35	9,825	48	9,381	50	9,687	48
CONNAUGHT,	5,746	38	6,348	34	6,174	35	3,823	58	3,473	63	3,673	59
TOTAL,	38,320	37	40,002	35	37,637	37	29,259	48	27,614	51	30,411	46

Deaths.—Whilst the births registered in the province of Leinster, during the quarter ending 31st March, 1867, afforded the lowest ratio, the deaths registered give the highest rate of mortality, the number being 8,898, equal to an annual ratio of 1 in 39. In Munster the number registered was 8,153, yielding a ratio of 1 in 45; in Ulster, 9,687, or 1 in 48; and in Connaught, 3,673, or 1 in 59 of the estimated population.

Second Quarter.—April, May, June.

Marriages.—The number of marriages registered in Ireland during the second quarter of 1867 amounted to 5,155, equal to an annual ratio of 1 in every 270, or .371 per cent. of the estimated population. The number registered in the corresponding period of 1866 was 6,081.

Of the 5,155 marriages registered during the second quarter of 1867, 3,097 were between Roman Catholics, representing an annual ratio of 1 marriage in every 349, or .287 per cent. of the Roman Catholic population; and the remaining 2,058 marriages were between Protestants, being equal to an annual ratio of 1 in every 150, or .666 per cent. of the Protestant population.

Births.—The births registered during the second quarter of 1867 amounted to 40,063—20,528 boys, and 19,535 girls—affording an annual ratio of 1 in every 34·7, or 2·88 per cent. of the estimated population. The average number of births registered during the corresponding quarter of the preceding three years was 38,870.

Deaths.—There were 24,121 deaths—12,160 males, and 11,961 females—registered during the quarter, affording an annual ratio of 1 in 57·6, or 1·74 per cent. of the estimated population. The average number registered during the second quarter of the previous three years was 24,343.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 30th June, 1867, amounted to 34,889—19,556 males and 15,333 females—being 6,235 less than the number who emigrated during the corresponding quarter of 1866, when the number amounted to 41,124. The number in the second quarter of 1865 was 37,588, and in the corresponding quarter of 1864 it was 48,802.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 30th June, 1867, being 40,063; the deaths 24,121; and the number of emigrants 34,889—(according to the returns obtained by the enumerators at the several seaports); a decrease of 18,947 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

With the exception of beef, the prices of provisions were much higher during the second quarter of 1867, than they were in the corresponding quarter of the previous year. There was a considerable increase in the number of persons receiving Poor Law relief.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the second quarter of 1867 was 8d., being three halfpence higher than the average for the corresponding quarter of the previous year; the price was 7½d. during the first two weeks and 8d. during the remaining weeks of the quarter.

The average price of oatmeal for the second quarter of 1867 at the Dublin Corn Exchange was 18s. 5d. per cwt., against 15s. 8d. for the corresponding quarter of the previous year. The average price of potatoes per cwt. at the Dublin Potato Market ranged from 5s. 3d. to 6s. 6d., being much higher than for the corresponding quarter of the previous year, when the prices ranged from 3s. 1d. to 3s. 11d.

Quarterly Reports.
Second Quarter.

The weekly average prices of beef at the Dublin Cattle Market for the quarter ranged from 53s. 6d. to 70s. 6d. per cwt., against 58s. to 72s. 6d. for the corresponding quarter of 1866.

The average number of persons receiving indoor relief in the Irish work-houses during the second quarter of 1867 was 55,399, against 51,404 for the corresponding quarter of 1866; the greatest number (57,664) was on Saturday in the first week of the quarter; on the corresponding day of the previous year there were but 54,810; the lowest number was on Saturday in the last week of the quarter, the number amounting to 52,787, against 48,444 on the corresponding day in 1866.

The average weekly number of persons receiving outdoor relief was 15,527, against 11,982 for the second quarter of 1866.

Of the persons receiving indoor relief during the second quarter of 1867 an average number of 425 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 466.

THE WEATHER.

The mean height of the barometer during the second quarter of 1867 was 29.740 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29.761 inches, 29.916 inches, and 29.838 inches respectively); the highest reading (30.554 inches) was on the 27th June, at 9.30 P.M., wind N.W., and the lowest (28.914 inches) was on the 14th April, at 3.50 P.M., wind W.

The mean temperature of the air during the quarter was 53.2° (it was 51.5°, 54.8°, and 53.6°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (79.4°) was on the 26th June, and the minimum (29.7°) was on the 22nd May.

Rain or snow fell on 47 days during the quarter. The rain-fall measured 5.173 inches; in the second quarter of 1866, 1865, and 1864 it was 7.796 inches, 5.816 inches, and 4.083 inches respectively. The greatest monthly rain-fall was in May, when 2.465 inches were registered; and the greatest amount in 24 hours (.733 in.) fell on the 10th of same month. In June the rain-fall measured only .496 in., a less quantity than fell in the corresponding month of any year since 1849, when the rain-fall in June was only .397 in.

There was a prevalence of westerly winds, the wind having been from W. on 20 days; from S.W. on 19 days; and from N.W. on 17 days. It blew from E. on 11 days; from S.E. on 9 days; from S. on 8 days; from N. on 6 days; and from N.E. on one day at 9.30 A.M.

HEALTH OF THE PEOPLE.

The state of the public health during the quarter ended 30th June, 1867, was on the whole satisfactory, the number of deaths showing a decrease of 502, when compared with the number registered in the corresponding period of 1866.

Diseases of the respiratory organs, induced by the inclemency of the weather, proved very fatal, and, as usual, most so among the old and the very young.

With some exceptions, there was a comparative freedom from diseases assuming an epidemic form. The various forms of fever prevailed in some districts, and one form excited much alarm, in consequence of the unhappy misnomer which was applied to it. The disease rapidly declined, and certainly, as many recoveries have been reported, it is not entitled to the fearful name of Black Death.

Measles, scarlatina, and whooping-cough proved very fatal in certain localities. In the Achill District, Newport Union, of the 35 deaths registered, 20 were referred to whooping-cough.

No death from small-pox was mentioned in the Registrars' notes for the second quarter of 1867.

The Registrar of the Carney District, No. 1, Sligo Union, reported the death of a woman "from uterine inflammation after parturition, caused by the unskilful management of a midwife," and adds that "the brutal treatment to which the poor are subjected at the hands of these women is most lamentable; instrumental aid being the alternative in almost every case to which the medical man is called. I would beg to urge upon my dispensary brethren similarly circumstanced to give a return of these cases so palpably attributable to the want of trained midwives in their respective districts."

Old age furnished a very large contingent to the death register during the quarter. In the Portglenone District, Ballymena Union, one-third of the deaths registered occurred in persons from 70 to 90-years of age; in the Lisburn District, Lisburn Union, 16 of the deaths registered were of persons who had passed the threescore and ten years; and the Registrar of the Tallow District, Lismore Union, stated that "a female died at the extreme age of 108 years, having retained her faculties to the last."

The beneficial effects resulting from the improved sanitary condition of their districts were recorded by the Registrars of Swords, Pomeroy, Kilskeer, Ballyragget, Galway, Castlegregory, Gurteen, and Carlow. In those districts where sanitary precautions are neglected, there fever is always present.

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The "North-Eastern" Division had the highest marriage-rate during the quarter ending 30th June, 1867. It also ranked first for the corresponding quarter of the preceding two years, and the "Eastern Division," which ranks second on the present occasion, was also second on those occasions. The "North-Western" Division ranks third; it only came fifth for the second quarter of 1865 and 1866.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the SECOND quarter of the years 1865, 1866, and 1867, is shown in the following Statement:—

Quarter ending 30th June,					
1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 171	North-Eastern, .	1 in 164	North-Eastern, .	1 in 180
2. Eastern, .	174	Eastern, .	164	Eastern, .	184
3. South-Eastern, .	253	South-Eastern, .	261	North-Western, .	287
4. South-Western, .	286	South-Western, .	261	South-Eastern, .	318
5. North-Western, .	307	North-Western, .	263	South-Western, .	339
6. South Midland, .	334	South Midland, .	309	North Midland, .	385
7. North Midland, .	335	North Midland, .	312	South Midland, .	392
8. Western, .	451	Western, .	337	Western, .	448

Births.—The birth-rate for the second quarter of 1867, was somewhat higher in six of the eight divisions than it was in the corresponding quarter of 1866. As to the remaining two divisions (Eastern and North-Midland) the former had a ratio of 1 in 35 in 1866 against a ratio of 1 in 36 for the corresponding quarter of 1867, and the latter had the same ratio for both years, viz., 1 in 40.

Quarterly Reports.
Second Quarter.

The numerical order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the SECOND quarter of 1865, 1866, and 1867, is shown in the following Statement:—

Quarter ending 30th June,

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern,	1 in 31	North-Eastern,	1 in 31	North-Eastern,	1 in 30
2. South-Western,	32	South-Western,	32	South-Western,	31
3. Eastern,	36	Eastern,	35	South-Eastern,	35
4. South Eastern,	36	South-Eastern,	36	Eastern,	36
5. North Midland,	40	North Midland,	40	North-Western,	38
6. North-Western,	40	Western,	41	Western,	38
7. South Midland,	42	North-Western,	42	South Midland,	39
8. Western,	43	South Midland,	43	North Midland,	40

Deaths.—The death-rate during the quarter in the Eastern Division was 1 in 46; the South-Eastern Division ranked second, with a ratio of 1 in 50; the North-Eastern third, the ratio being 1 in 53; the Western Division, as usual, had the lowest death-rate, the number of deaths registered during the second quarter of 1867 being only equal to a ratio of 1 in 77. In the corresponding quarter of 1866 the ratio in this division was 1 in 76; and in the second quarter of 1865 the ratio was 1 in 75.

The following Statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the SECOND quarter of 1865, 1866, and 1867:—

Quarter ending 30th June,

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern,	1 in 49	Eastern,	1 in 45	Eastern,	1 in 46
2. North-Eastern,	50	North-Eastern,	48	South-Eastern,	50
3. South-Eastern,	52	South-Eastern,	50	North-Eastern,	53
4. South-Western,	61	South Midland,	61	South-Western,	57
5. South Midland,	62	South-Western,	62	South Midland,	57
6. North-Western,	64	North Midland,	66	North Midland,	66
7. North Midland,	70	North-Western,	67	North-Western,	76
8. Western,	75	Western,	76	Western,	77

PROVINCES.

Marriages.—The number of marriages registered in the Province of Ulster during the quarter ending 30th June, 1867, affords an annual ratio of 1 in 221; in Leinster the ratio was 1 in 226; in Munster, 1 in 369; and in Connaught, 1 in 397.

The following Table shows, by PROVINCES, the number of Marriages registered during the SECOND quarter of the years 1865, 1866, and 1867; together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES,	MARRIAGES.					
	Quarter ending 30th June,					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,662	1 in 209	1,778	1 in 194	1,516	1 in 226
MUNSTER,	1,225	304	1,263	291	994	369
ULSTER,	2,223	211	2,333	199	2,097	221
CONNAUGHT,	549	403	707	309	548	397
TOTAL,	5,659	1 in 249	6,081	1 in 230	5,155	1 in 270

Births.—The largest number of births, both actually and relatively, during the second quarter of 1867, was registered in the province of Ulster, the annual ratio afforded being 1 in 32·9 of the population; in Munster the ratio was 1 in 33; in Leinster, 1 in 37; and in Connaught, 1 in 38.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the SECOND quarter of the years 1865, 1866, and 1867, together with the ratio to the estimated Population.

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 30th June,						Quarter ending 30th June,					
	1865.		1866.		1867.		1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	9,138	1 in 38	9,173	1 in 38	9,202	1 in 37	6,660	1 in 52	7,096	1 in 49	6,951	1 in 49
MUNSTER,	10,931	34	10,647	35	11,101	33	6,143	61	5,975	62	6,432	57
ULSTER,	13,801	34	13,573	34	14,080	33	8,447	56	8,658	54	7,852	59
CONNAUGHT,	5,239	42	5,392	41	5,680	38	3,000	74	2,894	76	2,886	75
TOTAL,	39,109	36	38,785	36	40,053	35	24,250	58	24,623	57	24,121	58

Deaths.—The number of deaths registered in the province of Leinster during the second quarter of 1867 afforded an annual ratio of 1 in 49; in Munster the ratio was 1 in 57; in Ulster, 1 in 59; and in Connaught, 1 in 75 of the estimated population.

Third Quarter.—July, August, September.

 Third
Quarter.

Marriages.—The number of marriages registered in Ireland during the third quarter of 1867 amounted to 5,486, equal to an annual ratio of 1 in every 253, or 395 per cent. of the estimated population. The number registered in the corresponding period of 1866 was 5,566.

Of the 5,486 marriages registered during the third quarter of 1867, 3,323 were between Roman Catholics, representing an annual ratio of 1 marriage in every 325, or 308 per cent. of the Roman Catholic population; and the remaining 2,163 marriages were between Protestants, being equal to an annual ratio of 1 in every 143, or 700 per cent. of the Protestant population.

Births.—There were 34,192 births registered in Ireland during the quarter ending 30th September, 1867—17,641 boys and 16,551 girls—representing an annual ratio of 1 in every 40·6, or 2·48 per cent. of the estimated population; the average number of births registered during the corresponding quarter of the preceding three years was 33,834.

Deaths.—The deaths registered in Ireland during the third quarter of the year 1867 amounted to 18,497—9,409 males and 9,088 females—affording an annual ratio of 1 in every 75·1, or 1·33 per cent. of the estimated population. The average number registered during the corresponding quarter of the previous three years was 18,808.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland during the quarter ended 30th September, 1867, amounted to 18,475—9,851 males and 8,624 females—being 1,165 less than the number who emigrated during the corresponding quarter of 1866.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 30th September, 1867, being 34,192; the deaths 18,497; and the number of emigrants 18,475—(according to the returns obtained by the enumerators at the several seaports);—a decrease of 2,780 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.*Third Quarter.*

The prices of bread and oatmeal in Dublin were considerably higher during the third quarter of 1867 than during the corresponding period of 1866; the prices of beef ranged somewhat lower.

The average price of Messrs. Manders and Co.'s 4-lb. loaf for the third quarter of 1867 was 8d. (being three halfpence more than the average for the corresponding quarter of 1866); the price was raised to 8½d. for the last week of the quarter.

The average price of oatmeal at the Dublin Corn Exchange for the third quarter of 1866 was 15s. 5d. per cwt.; for the corresponding quarter in 1867 it was 19s. 4d.; for the first week of the quarter the average price was 18s. 9d.; it rose to 22s. for the eighth and ninth weeks. The average price during the last week was 18s.

The price of potatoes at the Dublin Potato Market averaged from 3s. 5d. to 5s. 1d.; for the corresponding quarter of 1866 the average prices were 3s. 8d. to 5s. 2d. per cwt.

The average prices of beef at the Dublin Cattle Market for the third quarter of 1867 ranged from 50s. to 66s. 6d. per cwt., against 52s. to 69s. 6d. during the corresponding quarter of 1866. The prices quoted for the first week of the quarter were 54s. to 67s. 6d.; for the last week they were 45s. to 63s.

The average number of persons in Ireland receiving indoor relief on Saturdays, during the third quarter of 1867 was 47,911, against 44,978 for the corresponding period of 1866.

The average weekly number of persons receiving outdoor relief during the third quarter of 1867 was 13,731, against 10,909 for the third quarter of 1866.

Of the persons receiving indoor relief during the third quarter of 1867 an average number of 433 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 449.

THE WEATHER.

The mean height of the barometer during the third quarter of 1867 was 29·786 inches (in the corresponding quarter of 1866, 1865 and 1864 it was 29·628 inches, 29·820 inches, and 29·804 inches respectively); the highest reading (30·381 inches) was on the 25th September, at 9.30 A.M., wind N.W.; and the lowest (29·219 inches) was on the 12th of the same month at 9.30 A.M., wind S.S.W.

The mean temperature of the air during the quarter was 58·5° (it was 56·9°, 60·8°, and 57·8°, respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (79·6°) was on the 13th August, and the minimum (35·6°) was on the 30th September.

Rain or snow fell on 46 days during the quarter. The rain-fall measured 6·058 inches; in the third quarter of 1866, 1865, and 1864 it was 6·656 inches, 6·318 inches and 4·137 inches respectively. The greatest monthly rain-fall was in July, when 2·673 inches were registered.

Westerly winds prevailed during the quarter, the wind (at 9·30 A.M.) having been on 21 days from W., on 21 days from S. W., and on 11 days from N.W.; it blew on 16 days from S., on 7 days from E., and on 6 days from N.; it was calm on 5 days at 9·30 A.M.

HEALTH OF THE PEOPLE.

As during the third quarter of 1867 the weather was fine, epidemics confined to a few districts, employment for labourers abundant, and wages good, so the health of the community was satisfactory.

The births registered during the third quarter of 1867 exceeded the number registered during the corresponding period of 1866 by 611, and the deaths registered show a decrease of 103, as compared with the September quarter of 1866.

It is obvious from the foregoing statement that the registration of deaths in Ireland is very imperfect.

That the health of the people improved within the last few years, may be inferred even from the imperfect registration. The publication of the notes from many intelligent and painstaking Registrars, who are also Medical Officers of Dispensary Districts, has had a very beneficial effect. Several of these gentlemen have during the third quarter of 1867, and also on former occasions, recorded improvements in the sanitary condition of their districts, which improvements they ascribe partly to their own exertions, and much to the publication of their notes in the Registrar-General's Quarterly Returns.

The Registrar of Forkill District, in the Union of Newry, stated that the "strict sanitary precautions of late carried into effect throughout the district, as regards whitewashing, removal of nuisances, sewerage, &c., have had a very beneficial effect."

As regards improved sanitary arrangements and their adoption, the Registrar of Kilmakevoge District, in the Union of Waterford, made the following observations:—"Deaths below the average, which may be attributed to the growing intelligence of the people, in being more attentive to cleanliness and ventilation, and being more temperate in their habits."

The encouragement afforded by the report of the Registrar of the Kilmakevoge District is unhappily counterbalanced by the account given by the Registrar of the Waterford (City) District, who stated that "Our sanitary arrangements are, perhaps, the worst in Ireland."

The Registrar of the Enniskillen District also stated that "the sanitary arrangements in the town are very bad."

Scarlatina prevailed in certain districts, and appeared to be endemic in many. In Loughgall District, Armagh Union, out of 33 deaths, 9 resulted from scarlatina. In Brookeborough, Lisnaskea Union, nearly one-half of the deaths were caused by scarlatina. Of 20 deaths registered in the Graigue District, Thomastown Union, so many as 9 were referred to scarlatina. In Carrignavar District, No. 1, Cork Union, scarlatina was the cause of one-sixth of the deaths, and in Carrignavar No. 2 District, in the same union, out of the 5 deaths registered, 4 were classed under the head of scarlatina. The Registrar of Cork District, No. 2, remarked upon the prevalence of scarlatina in his district, and in reference to sanitary precautions stated that "the Corporation are doing very much by whitewashing and cleansing the lanes, but still they allow manure to be collected from the streets and waterclosets, and deposited in yards, much to the detriment of the neighbourhood."

The following are the only important facts in reference to small-pox recorded in the Registrars' Notes:—

The Registrar of Crumlin District, Antrim Union, reported:—"Vaccination well attended to by parents. There has been no small-pox in the district for years."

The Registrar of Castlefinn District, Strabane Union, observed, "I have not seen a case of small-pox for two years. The people seem to have a great wish for early vaccination."

The Registrar of the Roundstone District, Clifden Union, reported a fatal case of small-pox; he did not, however, state whether the person who died from this loathsome (at the same time most preventable) disease, had been vaccinated.

Quarterly Reports.
Third Quarter.

The Registrar of Aclare District, Tobercurry Union, was most satisfactory in his report; his statement was as follows:—"There was one death from *unvaccinated small-pox*. The child had been the only one not vaccinated of a family of four young children, none of whom had ever had the small-pox. The other three children escaped even catching the disease."

The Registrar of Cullen District, Millstreet Union, stated that—"No case of small-pox occurred, vaccination having been fully carried out."

The following observations of the Registrar of the Whitechurch District, Dungarvan Union, add further evidence to that already adduced in support of the benefits arising from the Compulsory Vaccination Act:—"There has not been a case of small-pox in the district for the last three years, which may be attributed to the successful working of the Compulsory Vaccination Act."

Whooping-cough proved very fatal in some districts. In Brideswell Registration District, Athlone Union, 8 of the 20 deaths registered were referred to this disease. In the Johnstown District, Urlingford Union, the Registrar stated that "4 deaths arose from chincough (whooping-cough), of which there were 27 cases in my district. Two out of the 4 deaths occurred in the family of a labourer, and were attributable to overcrowding—the man, his wife, and five children occupying a single apartment barely twelve feet square." In the Killororan Registrar's District, Mountbellew Union, 9 deaths out of the 26 registered, were referred to whooping-cough; and in the Mountbellew District of the same union, 14 of the 34 deaths registered, were ascribed to the same disease.

Typhia, or typhoid fever, was more prevalent than typhus. A fatal case of fever, accompanied with ecchymosis, or dark patches of blood under the skin, occurred in the Rathcoole District, Celbridge Union, the duration of illness stated to have been only 14 hours.

The Registrar of the Clonmany District, Inishowen Union, directed attention to the prevalence of chest affections in his neighbourhood, which he attributed "to the occupation of the people, who are up all night gathering seaweed."

The deaths of many very aged persons were registered during the quarter. In the Carlingford District, Dundalk Union, 9 of those who died were from 70 to 98 years of age. In the Shercock District, Bailieborough Union, the ages of 3 persons whose deaths were registered, were stated to have been 80, 90, and 100 years respectively. In the Easky District, Dromore West Union, two persons died, who were both stated to have attained the advanced age of 100 years. In the Gort District, Gort Union, the ages of three persons whose deaths were recorded, were said to have been 85, 92, and 100 years. In the Milltown District, Killarney Union, a female pauper died who was said to have attained the age of 104 years.

In reference to the death of 6 men, caused by the explosion of a boiler in a flax mill, the Registrar of the Randalstown District, Antrim Union, made the following remarks:—"It seems strange there is a Government inspection of factories and none of flax mills, in which nearly all the terrible injuries and mutilations by machinery in the north of Ireland occur."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS, REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The number of marriages registered in the Eastern Division during the third quarter of 1867, afforded the highest annual ratio, viz.:—1 in 162 of the estimated population; in the North-Eastern Division the ratio was 1 in 177; in the North Midland Division the ratio was only 1 in 416; and in the Western Division 1 in 571.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the THIRD quarter of the years 1865, 1866, and 1867, is shown in the following statement:—

Quarterly Reports.
Third Quarter.

Quarter ending 30th September,

	1865.		1866.		1867.		
	Divisions.	Ratio.		Divisions.	Ratio.		
1. Eastern, . . .	1 in 157		Eastern, . . .	1 in 163		Eastern, . . .	1 in 162
2. North-Eastern, . . .	" 164		North-Eastern, . . .	" 173		North-Eastern, . . .	" 177
3. South-Eastern, . . .	" 240		South-Eastern, . . .	" 265		South-Eastern, . . .	" 249
4. South-Western, . . .	" 281		South-Western, . . .	" 273		South-Western, . . .	" 277
5. North-Western, . . .	" 314		South Midland, . . .	" 315		South Midland, . . .	" 293
6. South Midland, . . .	" 320		North Midland, . . .	" 344		North-Western, . . .	" 326
7. North Midland, . . .	" 365		North-Western, . . .	" 369		North Midland, . . .	" 416
8. Western, . . .	" 463		Western, . . .	" 501		Western, . . .	" 571

Births.—The “North-Eastern” Division had the highest birth-rate during the quarter ending 30th September, 1867, 1 in 35; the “South-Midland” had the lowest, 1 in 49; these divisions also held the first and last positions respectively for the corresponding quarter of the two previous years.

The numerical order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the THIRD quarter of 1865, 1866, and 1867, is shown in the following Statement:—

	1865.		1866.		1867.		
	Divisions.	Ratio.		Divisions.	Ratio.		
1. North-Eastern, . . .	1 in 36		North-Eastern, . . .	1 in 36		North-Eastern, . . .	1 in 35
2. Eastern, . . .	" 40		Western, . . .	" 40		South-Western, . . .	" 38
3. Western, . . .	" 40		South-Western, . . .	" 41		Eastern, . . .	" 41
4. South-Western, . . .	" 42		Eastern, . . .	" 42		Western, . . .	" 41
5. South-Eastern, . . .	" 45		North Midland, . . .	" 45		South-Eastern, . . .	" 42
6. North Midland, . . .	" 45		South-Eastern, . . .	" 45		North Midland, . . .	" 46
7. North-Western, . . .	" 46		North-Western, . . .	" 46		North-Western, . . .	" 47
8. South Midland, . . .	" 47		South Midland, . . .	" 52		South Midland, . . .	" 49

Deaths.—The rate of mortality, during the third quarter of the year 1867, was highest in the “Eastern” Division, 1 in 54; in the corresponding quarter of 1866 the rate in this division was 1 in 55; and in the third quarter of 1865 it was 1 in 59.

The number of deaths registered in the “Western” Division, during the quarter of the year under consideration, only affords an annual ratio of 1 in 101 of the estimated population; this division had also the lowest death-rate in the corresponding quarter of each year since registration commenced in this country.

The following Statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the THIRD quarter of 1865, 1866, and 1867:—

Quarter ending 30th September,

	1865.		1866.		1867.		
	Divisions.	Ratio.		Divisions.	Ratio.		
1. Eastern, . . .	1 in 59		Eastern, . . .	1 in 55		Eastern, . . .	1 in 54

XXX. · *Fourth Annual Report of the Registrar-General of*

Quarterly Reports.

PROVINCES.

Marriages.—The number of marriages registered in the province of Leinster during the quarter ending 30th September, 1867, affords an annual ratio of 1 in 195; in Ulster, 1 in 226; in Munster, 1 in 293; and in Connaught, 1 in 502.

The following Table shows, by PROVINCES, the number of Marriages registered during the THIRD quarter of the years 1865, 1866, and 1867, together with the annual ratio to the estimated Population.

REGISTRATION PROVINCES.	MARRIAGES.

CONNAUGHT,	5,604	39	5,626	39	5,335	41	2,269	97	2,154	102	2,184	100
TOTAL,	34,045	41	33,581	42	34,192	41	18,632	76	18,600	75	18,497	75

Deaths.—The deaths registered in the Province of Leinster during the quarter ending the 30th September, 1867, represent an annual ratio of 1 in 62; in Ulster and Munster, each 1 in 77; and in Connaught, 1 in 100.

Fourth Quarter.—October, November, December.

Marriages.—There were 6,273 marriages registered in Ireland during the fourth quarter of 1867, a number affording an annual ratio of 1 in every 221, or .452 per cent. of the estimated population. Of this number 3,902 were between Roman Catholics, representing a ratio of only 1 marriage in every 277, or .362 per cent. of Roman Catholics, and 2,371 were between Protestants, affording a ratio of 1 in every 130, or .767 per cent. of the Protestant population. The average number of marriages registered in the corresponding quarter of the previous three years was 6,577.

Births.—There were 32,496 births registered in Ireland during the quarter ending 31st December, 1867—16,850 boys and 15,646 girls—representing an annual ratio of 1 in every 42.8, or 2.34 per cent. of the estimated population; the average number of births registered during the corresponding quarter of the preceding three years was 33,620.

Deaths.—The deaths registered in Ireland during the fourth quarter of the year 1867 amounted to 20,474—10,369 males and 10,105 females—affording an annual ratio of 1 in every 67.9, or 1.47 per cent. of the estimated population. The average number registered during the corresponding quarter of the previous three years was 21,653.

Emigration.—According to the returns obtained by the Enumerators, the number of emigrants who left the ports of Ireland, during the quarter ended 31st December, 1867, amounted to 13,227—7,110 males and 6,117 females—being 333 more than the number who emigrated during the corresponding quarter of 1866.

Estimated Decrease of the Population.—The number of births registered during the quarter ended 31st December, 1867, being 32,496; the deaths 20,474; and the number of emigrants 13,227 (according to the returns obtained by the enumerators at the several seaports); a decrease of 1,205 would, therefore, appear to have taken place in the population of Ireland during that period.

PRICES OF PROVISIONS, AND PAUPERISM.

The price of Messrs. Manders & Co.'s 4-lb. loaf during the first week of the fourth quarter of 1867 was 8½d.; during the remaining weeks of the quarter the price was 9d.; the average price during the corresponding quarter of 1866 was 7½d.; during that of 1865 it was 7d.; and during the fourth quarter of 1864 the average price was 5½d. The 4-lb. loaf was, therefore, 63½ per cent. higher in price during the last quarter of 1867 than during the corresponding period of 1864.

The average price per cwt. of oatmeal for the quarter was 17s. 4d.; for the corresponding quarter of 1866 it was 15s. 11d.; for that of 1865 it was 15s. 1d.; and for that of 1864 it was 10s. 10d. A rise of 60 per cent. took place in the price of oatmeal between 1864 and 1867.

The average prices per cwt. of potatoes for the fourth quarter of 1867, at the Dublin Potato Market, were 3s. 10d. to 4s. 7d.; the average prices for the corresponding quarter of 1866 were 3s. 1d. to 4s. 11d.; for 1865 they were 2s. 9d. to 3s. 8d.; and for the last quarter of 1864 the average prices were 2s. 2d. to 3s. 4d.

The average price of beef at the Dublin Cattle Market, during the quarter ranged from 45s. 6d. to 62s. per cwt.; for the fourth quarter of 1866 the average prices were 48s. 6d. to 67s.

The following statement shows the average prices of the above articles of food in Dublin during the fourth quarter of the years 1864–7:—

YEARS.	BREAD	OATMEAL	POTATOES	BEEF
	(Messrs. Manders & Co.'s 4-lb. loaf).	(Corn Exchange), per cwt.	(at Potato Market), per cwt.	(at Dublin Cattle Market), per cwt.
1864 (4th quarter),	5½	10 10	2 2 to 3 4	49 6 to 65 6
1865 ,	7	15 1	2 9 to 3 8	50 6 to 63 6
1866 ,	7½	15 11	3 1 to 4 11	48 6 to 67 0
1867 ,	9	17 4	3 10 to 4 7	45 6 to 62 0

Quarterly Reports.
Fourth Quarter.

The average number of persons in Ireland receiving indoor relief on Saturdays during the fourth quarter of 1867 was 50,775, against 48,534 for the corresponding period of 1866.

The average weekly number of persons receiving outdoor relief during the quarter was 13,467, against 11,217 for the fourth quarter of 1866.

Of the persons receiving indoor relief during the fourth quarter of 1867, an average number of 431 in each week were located in Asylums for the Blind and the Deaf and Dumb, and in Extern Hospitals; in the corresponding quarter of 1866 the average weekly number was 443.

THE WEATHER.

At the Ordnance Survey Office, Phoenix Park, the mean height of the barometer during the fourth quarter of the year 1867, was 29.934 inches (in the corresponding quarter of 1866, 1865, and 1864 it was 29.773 inches, 29.674 inches, and 29.686 inches respectively); the highest reading (30.583 inches) was on the 21st November, at 9.30 P.M., wind N., and the lowest (29.006 inches) was on the 1st December, at 9.30 A.M., wind S.W.

The mean temperature of the air during the quarter was 44.6° (it was 46.4°, 46.5°, and 44.4° respectively, in the corresponding quarters of 1866, 1865, and 1864); the maximum temperature (67.6°) was on the 10th October, and the minimum (25.0°) was on the 28th November.

Rain or snow fell on 48 days during the quarter. The rain-fall was unusually small, having measured only 4.631 inches; in the fourth quarter of 1866 it was 4.897 inches, while in the corresponding quarters of 1865 and 1864 it amounted to 10.112 inches, and 12.040 inches respectively. The greatest monthly rain-fall during the quarter was in October, when 3.034 inches, or nearly two-thirds of the entire quantity, were registered.

As usual, the west wind was most prevalent during the quarter, having blown (at 9.30 A.M.) for 27 days. The wind was from S.W. on 17 days; from N.W. on 14 days; from S. on 5 days; from S.E. on 8 days; from E. on 2 days; from N.E. on 7 days; and from N. on 3 days; it was calm on 9 days at 9.30 A.M.

HEALTH OF THE PEOPLE.

The deaths registered during the quarter ended December 31st, 1867, show a decrease of 1,716 as compared with the number registered in the corresponding period of the year 1866, when Asiatic cholera was epidemic.

To the mildness of the season and the improved sanitary condition of the country, the lessened mortality during the quarter may be fairly ascribed; for, though scarlatina, measles, and whooping-cough were very prevalent, and very fatal throughout the country, yet the number of deaths registered during the last quarter of 1867 was less than the number registered during the last quarter of any year since the Registration Act came into operation in 1864.

Scarlatina was the zymotic disease to which most deaths were ascribed. In the Keady district, Armagh Union, of the 44 deaths registered 15 resulted from scarlatina; in the Banbridge district more than one-fourth of the deaths were referred to scarlatina; at Downpatrick 13 of the 65 deaths registered were attributed to this disease; in the Bellaghy District, Magherafelt Union, of the 56 deaths registered 16 were caused by scarlatina. The Registrar of the Palmerston District, South Dublin Union, remarked that "scarlatina has been epidemic during the quarter of a mild form except in one locality (Island bridge), where 4 deaths occurred, out of 5 cases in the whole district. I attribute this to a sand-pit having been filled up with refuse vegetable and other matter." In Cork City No. 2 (North) District, 31 of the 89 deaths registered were caused by scarlatina.

Whooping-cough and measles caused many deaths.

The Registrar of Navan reported 1 death from small-pox : "the patient had been previously vaccinated." The Registrar of the Dunmore District, Tuam Union, stated that "some cases of small-pox occurred in this district ; it proved fatal in 1 case, that of a child six months old who had not been vaccinated." The Registrar of the Hollymount District, Ballinrobe Union, reported that "there have been 5 or 6 cases of small-pox arising from the pernicious custom of inoculation, but it has been impossible to detect the perpetrators owing to their carefulness to avoid detection, and the sympathy of the poor with their acts." It is satisfactory to observe that the "Compulsory Vaccination Act" has been highly successful, for, during the year 1867, the total deaths from small-pox registered did not amount to more than 21 ; whereas in the year 1864, in which the Act came into operation, no less than 854 deaths were caused by small-pox.

Many of the persons whose deaths were reported during the fourth quarter of 1867 had attained very advanced periods of life. A female died in the Kiltormer District, Ballinasloe Union, whose age was stated to have been 107 years. The Registrar of the Enniscorthy District, No. 2, Enniscorthy Union, stated that "It is a remarkable fact that upwards of one-third of those whose deaths were registered last quarter had reached the patriarchal age of 74 years, and 1 woman whose death has not yet been registered, lived, I am informed, to be 106 years old." In the Blackwatertown District, Armagh Union, "the deaths (4 excepted) are of very old persons, 1 of 92 and another of 103 years." In Bellanagh District, Cavan Union, the death of a person stated to have been 104 years old was registered.

The Registrar of Shinrone District, Roscrea Union, remarked that "nearly all the deaths have been caused by old age. Of the 10 deaths registered 3 were over 80 years, 1 was 90 years and another 104 years and 9 months. The last-mentioned, a man, retained all his faculties to the last, except hearing, which he had nearly lost, and was engaged making a fence a short time before his death." The death of a man (as stated) aged 103 years was registered in the Glenavy District, Union of Lisburn ; and in Newry District, No. 1, "12 of the persons whose deaths were registered were between 70 and 80 ; 2 between 80 and 90 ; one, 100 ; and 1 had arrived at the advanced age of 106 years."

There were few unfavourable reports of the sanitary condition of the Registrars' Districts. The Registrar of Caherconlish District, Limerick Union, made the following statement, "Fever, though not virulent, has never quitted one portion of the district since my appointment, which I attribute to want of cleanliness on the part of the poor occupiers, and it not being a police patrol district it is entirely neglected." The poisonous effects resulting from the noxious effluvia from sewers, were well illustrated by a death from cholera, registered in the Mitchelstown District, Mitchelstown Union ; the Registrar of the district observed that "the deceased was a mason, and was employed at work over a very foul sewer when he first complained."

NUMBER OF MARRIAGES, BIRTHS, AND DEATHS REGISTERED IN EACH OF THE EIGHT DIVISIONS.

Marriages.—The North-Eastern Division had the greatest number of marriages registered in proportion to its population during the last quarter of the year 1867, the annual ratio being 1 in 140. In the Eastern Division the ratio was 1 in 160. These two Divisions also ranked first and second respectively in the corresponding quarters of 1865 and 1866. In the Western Division the ratio was only 1 in 457. The low ratio is to be accounted for by the large proportion of the Roman Catholic marriages being celebrated in the first quarter of the year.

xxxiv. Fourth Annual Report of the Registrar-General of

Quarterly
Reports.
Fourth
Quarter.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Marriages registered during the FOURTH quarter of the years 1865, 1866, and 1867 is shown in the following Statement:—

Quarter ending 31st December,

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern, .	1 in 126	North-Eastern, .	1 in 131	North-Eastern, .	1 in 140
2. Eastern, . . .	" 152	Eastern, . . .	" 163	Eastern, . . .	" 160
3. North-Western, .	" 224	South-Eastern, .	" 219	North-Western, .	" 233
4. South-Eastern, .	" 238	North-Western, .	" 236	South-Eastern, .	" 240
5. North Midland, .	" 254	South Midland, .	" 262	South Midland, .	" 270
6. South Midland, .	" 256	South-Western, .	" 304	South-Western, .	" 363
7. South-Western, .	" 278	North Midland, .	" 317	North Midland, .	" 305
8. Western, . . .	" 363	Western, . . .	" 426	Western, . . .	" 457

Births.—The births registered during the last quarter of 1867 in the North-Eastern Division amounted to 7,579, affording an annual ratio of 1 in 36 of the estimated population; in the corresponding quarter of 1866 the ratio was also 1 in 36; and in 1865 it was 1 in 37; in the South Midland Division the ratio afforded was only 1 in 52 in 1867 and the two preceding years.

The order of the EIGHT DIVISIONS as regards the annual Rate represented by the number of Births registered during the FOURTH quarter of 1865, 1866, and 1867, is shown in the following Statement:—

Quarter ending 31st December,

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. North-Eastern, .	1 in 37	North-Eastern, .	1 in 36	North-Eastern, .	1 in 36
2. Western, . . .	" 40	Western, . . .	" 37	Western, . . .	" 39
3. South-Western, .	" 40	South-Western, .	" 39	South-Western, .	" 42
4. Eastern, . . .	" 43	Eastern, . . .	" 43	Eastern, . . .	" 46
5. North-Western, .	" 45	South-Eastern, .	" 45	North-Western, .	" 46
6. North Midland, .	" 45	North Midland, .	" 46	North Midland, .	" 48
7. South-Eastern, .	" 46	North-Western, .	" 46	South-Eastern, .	" 49
8. South Midland, .	" 52	South Midland, .	" 52	South Midland, .	" 52

Deaths.—The Eastern Division had the highest death-rate during the fourth quarter of 1867, the annual ratio afforded being 1 in 51 of the estimated population; in the corresponding quarter of 1866 the death-rate in this division was 1 in 40, and in 1865 it was 1 in 51. In the North Midland Division the deaths registered during the fourth quarter of 1867 represent an annual ratio of 1 in 79 against 1 in 78 for the fourth quarter of 1866, and 1 in 83 for the fourth quarter of 1865; in the North-Western Division the ratio was 1 in 87 against 1 in 88 for 1866, and 1 in 84 for 1865; and in the Western it was 1 in 97 against 1 in 92 for the corresponding quarter of 1866, and 1 in 90 for 1865.

The following Statement shows the EIGHT DIVISIONS arranged according to the annual Rate of Mortality afforded by the number of Deaths registered during the FOURTH quarter of 1865, 1866, and 1867:—

Quarter ending 31st December,

1865.		1866.		1867.	
Divisions.	Ratio.	Divisions.	Ratio.	Divisions.	Ratio.
1. Eastern, . . .	1 in 51	Eastern, . . .	1 in 40	Eastern, . . .	1 in 51
2. North-Eastern, .	" 59	South-Eastern, .	" 54	South-Eastern, .	" 59
3. South-Eastern, .	" 60	North-Eastern, .	" 61	North-Eastern, .	" 63

6. North Midland, .	" 83	North Midland, .	" 78	North Midland, .	" 79
7. North-Western, .	" 84	North-Western, .	" 88	North-Western, .	" 87
8. Western, . . .	" 90	Western, . . .	" 92	Western, . . .	" 97

PROVINCES.

Marriages.—The number of marriages registered in the province of Ulster during the fourth quarter of 1867 amounted to 2,733, a number representing an annual ratio of 1 in every 169 of the estimated population; in Leinster the number was 1,842, or 1 in 186; in Munster 1,180, or 1 in 310; and in Connaught 518, or only 1 in 420.

The following Table shows, by PROVINCES, the number of Marriages registered during the FOURTH quarter of the years 1865, 1866, and 1867, together with the annual ratio to the estimated Population:—

REGISTRATION PROVINCES.	MARRIAGES.					
	Quarter ended 31st December,					
	1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	1,960	1 in 177	1,828	1 in 188	1,842	1 in 186
MUNSTER,	1,281	, 290	1,232	, 299	1,180	, 310
ULSTER,	3,076	, 153	2,842	, 164	2,733	, 169
CONNAUGHT,	664	, 333	580	, 377	518	, 420
TOTAL,	6,981	1 in 202	6,482	1 in 215	6,273	1 in 221

Births.—The births registered in Leinster during the fourth quarter of 1867 afford an annual ratio of only 1 in 49 of the estimated population—in the corresponding quarter of 1865 the ratio was 1 in 47, and in 1866, 1 in 46. In Munster there were registered 8,237 births—a number equal to an annual ratio of 1 in 44 (the ratio for the fourth quarter of 1865 and 1866 being 1 in 43 and 1 in 42, respectively); in Ulster the number was 11,661, or 1 in 40, which was also the ratio for the corresponding quarter of 1865 and 1866; and in Connaught 5,671, or 1 in 38, against 1 in 39 for 1865, and 1 in 37 for 1866.

The following Table shows, by PROVINCES, the number of Births and Deaths registered during the quarters ending 31st December, 1865, 1866, and 1867, and the ratio to the estimated Population:—

REGISTRATION PROVINCES.	BIRTHS.						DEATHS.					
	Quarter ending 31st December,						Quarter ending 31st December,					
	1865.		1866.		1867.		1865.		1866.		1867.	
	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.	Number.	Ratio.
LEINSTER,	7,437	1 in 47	7,458	1 in 46	6,927	1 in 49	6,062	1 in 57	7,544	1 in 46	5,985	1 in 57
MUNSTER,	8,710	43	8,729	42	8,237	44	5,491	68	5,488	67	5,500	67
ULSTER,	11,729	40	11,711	40	11,661	40	6,959	67	6,759	69	6,590	70
CONNAUGHT,	5,820	39	5,824	37	5,671	38	2,501	88	2,399	91	2,399	91
TOTAL,	33,496	42	33,722	41	32,496	43	21,013	67	22,190	63	20,474	68

Deaths.—There were 5,985 deaths registered in the province of Leinster during the fourth quarter of 1867, the annual ratio afforded being 1 in 57—in the fourth quarter of 1866 the ratio was 1 in 46, and in 1865 it was 1 in 57. In Munster there were registered 5,500 deaths, or 1 in 67 of the estimated population, against 1 in 67 for the corresponding quarter of 1866, and 1 in 68 for the fourth quarter of 1865; in Ulster, 6,590 or 1 in 70, against 1 in 69 in 1866, and 1 in 67 in 1865; and in Connaught, 2,399, or only 1 in 91, against 1 in 91 for the fourth quarter of 1866, and 1 in 88 for 1865.

TOPOGRAPHICAL DESCRIPTION of the EIGHT DIVISIONS into which
IRELAND has been divided in the foregoing TABLES.

NO. I. The North-Eastern Division.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

NO. II. The North-Western Division is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysadare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

NO. III. The Eastern Division is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenspoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

NO. IV. The North Midland Division is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

NO. V. The South Midland Division, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty Mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

NO. VI. The Western Division.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

NO. VII. The South-Eastern Division.—This division extends from its junction with the "Eastern" division southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the South Midland division. It embraces the county of Waterford; nearly the whole of the county of Wexford; parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork County.

NO. VIII. The South-Western Division extends along the southern and western coasts from Cork Harbour to the river Shannon, and embraces the county of Kerry, nearly the whole of the counties of Cork and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1867 :—

Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.			Middle of the Years	Estimated POPULATION.		
	Persons.	Males.	Females.		Persons.	Males.	Females.		Persons.	Males.	Females.

NOTE.—This table has been constructed for the years 1801 to 1891—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; the difference between the number arrived at by this computation and the *actual* number by the Census of 1851 was divided over the intervening years in proportion to the number of recorded deaths and the number of emigrants.

1852 to 1861—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and apportioning the difference as explained for the last period.

1862 to 1867—The English birth and death rates, as above, were employed in the calculations for each year deducting the number of emigrants according to the returns received by the Registrar-General for Ireland.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Counties Proper.

† See note (†) page 2.

* For remainder of Belfast see next page.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

Abstract of Births and Deaths, 1867.

Causes of Death in Ireland, 1867.

IRELAND.—SUPPLEMENTARY TABLE OF THE

[In the foregoing Tables all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 114 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired, partial correction,

* The Registration Counties consist of groups of Superintendent Registrars' Districts or Poor Law Unions. Whenever a District or Union extends into more than one County, it is assigned wholly to that County in which the greater portion of the population is located; hence all the Registration Counties differ more or less from the Counties Proper.

LETTER to the REGISTRAR-GENERAL on the CAUSES of DEATH in IRELAND,
from WILLIAM M. BURKE, F.C.P.I.

YEAR 1867.

SIR,

I have the honour of submitting to you a few observations on the assigned causes of the deaths registered in Ireland during the year 1867.

The health of the people during the year 1867 was, on the whole, good. The excess of deaths (476), as compared with the year preceding, may be accounted for by improvement in the working of the Registration Act.

I. ZYMATIC DISEASES.

The deaths from Zymotic diseases amounted to 16,066—8,028 males and 8,038 females—showing a decrease of 3,560 as compared with the year preceding. Of all the deaths registered during the year, 1 in every 5·8 was caused by diseases of this class.

Fever was the cause of 3,750 deaths—1,957 males and 1,793 females—or 1 in every 25 of the total deaths.

Scarlet fever contributed 2,145 deaths—1,117 males and 1,028 females. The number of deaths registered from this disease during the preceding year was 3,501. One in every 44 of the deaths from all causes resulted from this disease.

The mortality from whooping-cough was great; the deaths from this disease numbered 2,144—911 males and 1,233 females—or 1 in every 44 of the deaths from all causes. The deaths from whooping-cough exceeded by 408 the number registered in the year preceding. This disease was most fatal in the South-Eastern Division.

Diarrhoea proved fatal in 1,920 instances—944 males and 976 females—or 1 in every 49 of all the deaths. 912 of the persons who died from diarrhoea were under 5 years of age, and 401 were aged 65 years and upwards.

1,365 deaths—742 males and 623 females—were caused by croup, or 1 in every 68 of all the deaths registered.

Measles caused 1,292 deaths—667 males and 625 females. The number of deaths registered from this disease in 1866 was only 851.

The deaths from diphtheria have shown a remarkable decline since the year 1864, when the deaths from diphtheria amounted to 661; they numbered, 480 in 1865; 317 in 1866, and 189 in 1867—96 males and 93 females.

387 deaths were referred to cholera. Of this number, 260 were registered during the first quarter of the year, 38 during the second, 62 during the third, and 27 during the last quarter.

Metria, or puerperal fever, caused 302 deaths.

Four females died from hydrocephalus.

Five deaths resulted from glanders—4 males and 1 female.

The deaths from small-pox amounted to 21, showing a decrease of 173 as compared with the year 1866.

II. CONSTITUTIONAL DISEASES.

From diseases termed constitutional there resulted 17,540 deaths—8,616 males and 8,924 females—or 1 in every 5·3 of all the deaths.

Phthisis or pulmonary consumption, caused 10,383 deaths—5,099 males and 5,284 females—or 1 in every 9 of the total deaths.

Under the vague heading "dropsy" 1,599 deaths were returned; of these, 693 were males and 906 females.

1,659 persons—749 males and 910 females—died from cancer.

Mesenteric disease caused 1,590 deaths—the sexes being equal.

The deaths from hydrocephalus or water on the brain numbered 1,047—597 males and 450 females.

Scrofula was the cause assigned for 1,011 deaths.

III. LOCAL DISEASES.

The number of deaths attributed to local diseases amounted to 32,322—17,419 males and 14,903 females—or 1 in every 2·9 of the total deaths registered.

Diseases of the nervous system caused 9,049 deaths—4,958 males and 4,091 females. Of this number 4,228 deaths (2,334 males and 1,894 females) were ascribed to convulsions; apoplexy caused 1,022 deaths (598 males and 424 females); paralysis caused 1,626 deaths (837 males and 789 females); 728 deaths (424 males and 304 females) were caused by cephalitis, or inflammation of the brain; 882 deaths were ascribed to brain disease unspecified.

3,324 deaths—1,810 males and 1,514 females—were caused by diseases of the organs of circulation; of these, 65 (35 males and 30 females) were caused by pericarditis or inflammation of the heart's covering; aneurism killed 94 persons—74 males and 20 females; to heart disease unspecified 3,165 deaths (1,701 males and 1,464 females) were referred.

Diseases of the respiratory organs, exclusive of phthisis, caused 13,703 deaths—6,996 males and 6,707 females. Bronchitis caused 10,067 deaths—4,929 males and 5,138 females; 1,677 deaths (1,025 males and 652 females) resulted from pneumonia or inflammation of the lungs; 727 deaths were attributed to asthma; 383 to pleurisy; 85 to laryngitis, and 764 to lung disease unspecified.

Diseases of the digestive organs produced 4,613 deaths—2,585 males, and 2,028 females. Of this number, inflammation of the bowels was the cause of 599 deaths—347 males and 252 females; peritonitis proved fatal in 280 instances—136 males and 144 females; 200 deaths are stated to have been caused by gastritis or inflammation of the stomach; ileus, under which heading are included obstruction of the bowels, constipation, &c., was the cause of 419 deaths—261 males and 158 females; to stomach disease unspecified 1,051 deaths were referred. Inflammation of the liver is the cause assigned for 242 deaths; jaundice 150; and liver disease unspecified 992.

Diseases of the urinary organs caused 1,061 deaths—822 males and 239 females. Of these, nephria or Bright's disease contributed 183 deaths; inflammation of the kidneys 42; stone in the bladder 25; inflammation of the bladder 56; diabetes 105; and kidney disease unspecified 596.

From diseases of the organs of generation there resulted 148 deaths.

210 deaths were ascribed to diseases of the organs of locomotion—the sexes being 124 males and 86 females.

To diseases of the integumentary system 214 deaths were ascribed, viz., 4 to phlegmon; 91 to ulcer; and 119 to skin disease unspecified.

IV. DEVELOPMENTAL DISEASES.

The deaths resulting from diseases connected with the growth and decay of the human frame amounted to 21,941—9,560 males, 12,381 females—or 1 in every 4·3 of all the deaths registered. Of the aforementioned deaths, 217 were referred to premature birth; 10 to cyanosis—of the persons whose deaths were attributed to this malformation, 9 were under 5 years of age, and 1 was aged between 10 and 15 years. Spina bifida caused 21 deaths; 17 deaths were returned under the head of “other malformations,” and 360 infants are stated to have died from teething.

620 women died in childbirth; if we add to the deaths from childbirth the number of deaths from metria or puerperal fever (302) it will be found that the total deaths resulting from the births registered during the year will amount to 922. For every 157 children born 1 mother died.

16,606 deaths were tabulated under the head of old age. Of these, 7,116 were males and 9,490 females.

To atrophy and debility 4,064 deaths were referred—2,096 males and 1,968 females.

V. VIOLENT DEATHS.

The number of deaths resulting from violent causes amounted to 2,177—1,485 males and 692 females—or 1 in every 43 of all the deaths registered. Four deaths in every 10,000 of the estimated population were caused by violence.

Of the deaths from violence, 1,887 were accidental, viz., 652 from fractures and contusions; 13 from gunshot wounds; 23 from cuts or stabs; 499 from burns or scalds—234 males and 265 females; 21 from poisoning; 454 from drowning—366 males and 88 females; 94 from suffocation—67 males and 27 females. Thirty of the persons whose deaths were caused by suffocation had not attained the age of 12 months. In 131 instances the nature of the accident which caused death was not stated.

151 deaths from homicide were registered; of these, 112 were cases of infanticide.

83 persons—59 males and 24 females—committed suicide, or 15 out of every 1,000,000 of the estimated population died by their own hands.

Of the men who committed self-destruction the means resorted to were as follows:—7 from gunshot wounds; 13 from cut or stab; 2 from poison; 10 from drowning, and 21 from hanging. Of the female suicides, the act was committed in 6 instances by cut or stab; 3 by poison; 9 by drowning, and 4 by hanging.

In 8 instances the means of self-destruction was not stated in the returns—6 men and 2 women.

In 56 instances of violent deaths it was not stated in the returns whether the death was accidental, suicidal, or homicidal, and consequently these deaths could not be classed in the tables.

In 442 cases of sudden death the cause was not ascertained.

The cause of death was unspecified or ill-defined in 3,015 instances, or 1 in 31 of the total deaths, showing a still further improvement in the returns, as in the year preceding the number of ill-defined or unspecified cases was in the proportion of 1 in 27 of the total deaths registered.

I have the honour to be,

Sir,

Your obedient servant,

W. M. BURKE.

To

The Registrar-General.

COPY of CIRCULAR relating to REGISTRATION of MARRIAGES celebrated by the ROMAN CATHOLIC CLERGY, 26 and 27 Vic., cap. 90.

General Register Office, Dublin,
31st December, 1863.

SIR,

I request you will furnish each Parish Priest within your District—who may apply to you for the same—with *six blank Forms of Certificates of Marriage*, which you will carefully take from the Certificate Book forwarded to you, and also with *six of the printed Envelopes*, addressed to “The Registrar of Births, Deaths, and Marriages.”

By this course—which has been strongly recommended to me by many Dignitaries of the Roman Catholic Church, and approved of by the Law Officers of the Crown—the convenience of the Catholic Population, especially those of the poorer classes, will be greatly promoted in regard to the Registration of their Marriages.

A further supply of Certificates will be forwarded on your application—from which *blank Forms* will be furnished by you, from time to time, to those Parish Priests within your District who may require them. You will request each Rev. Gentleman obtaining the Certificates, to give you a receipt for them (on the accompanying Forms), in order that you may be able to account to me for all the Certificates intrusted to your care; and you will furnish me, at the end of each month, with the Names and Addresses of those Clergymen to whom you supply them. You will observe they are on *Water-marked paper*, with the words “*Certificate of Marriage*” printed thereon.

I beg to say that I feel assured you will discharge the duties of your office with zeal, discretion, and courtesy, and thus largely contribute to the success of the very Important Measures, in the carrying out of which you have so readily undertaken to assist by accepting the office of Registrar.

I am, Sir,

Your obedient Servant,

WILLIAM DONNELLY,

Registrar-General.

To the

Registrar of Births, Deaths, and Marriages,
District of _____

INDEX OF SUPERINTENDENT REGISTRARS' DISTRICTS.

[The following Index furnishes a reference to the Number of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, the numbers running consecutively from 1 to 163.*]
