ABSTRACTS:—

Marriages registered in Ireland in each of the Divisions and Superintendent Registrars' Districts, also in each Province and County, in 1880, distinguishing Roman Catholic from Protestant Marriages, and giving the Total Number registered in each Quarter of the Year; the Conjugal Condition of Persons Married; the Number of Minors and of those who signed the Registers by Marks,	36-45
Ages of 10,404 Persons married in 1880, distinguishing those of Bachelors, Spinsters, Widowers, and Widows,	46-47
Marriages, Births, and Deaths registered in each of the Divisions and Superintendent Registrars' Districts, and in each Province and County in 1880; also Births and Deaths, and Excess of Births over Deaths in each of the Registrars' Districts of Ireland, distinguishing the Sexes and Illegitimate Births,	48-72
Births registered in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties (distinguishing Males and Females) in each of the Four Quarters of 1880,	74-83
Deaths registered in each of the Four Quarters of 1880 (distinguishing Males and Females), in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	84-93
Deaths of Males and Females at different Ages registered in 1880, in Divisions and Superintendent Registrars' Districts, also in Provinces and Counties,	94-101
Causes of Death of Males and Females in Ireland, at different periods of life, in 1880,	102-109
Supplementary Table of Causes of Death of Males and Females, at different periods of life, in 1880,	110-113
Causes of Death of Males and Females in Ireland, and in each of the Divisions, in 1880,	114-121
Deaths from several Zymotic and other Causes in 1880, in the Divisions and Superintendent Registrars' Districts, and in the Provinces and Counties,	122-125
Index to Superintendent Registrars' Districts, and Registrars' Districts,	126-133

REPORT

TO

His Excellency, FRANCIS THOMAS, EARL COWPER, K.G., &c., &c., &c.,
Lord Lieutenant-General and General Governor of Ireland.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit my Report on the Marriages, Births, and Deaths registered in Ireland during the year 1880, together with the General Abstracts in which the number, season, locality, and special nature of these events are set forth in detail.

Returns prepared from data supplied for the purpose by the Registrars, and containing approximate information on some of the more salient features of the Registration records, in so far as they relate to the Public Health, were issued after the close of each Quarter; and a preliminary Annual Abstract, compiled from the same sources, was presented to Parliament early last year.

The information given in those Returns, necessarily imperfect, has since been carefully revised, and in the Abstracts now submitted the corrected results will be found incorporated with many additional features of general interest and utility.

GENERAL SUMMARY.

The Marriages registered during the year number 20,363; the Births 128,086; and the Deaths 102,906. Both absolutely and in proportion to the estimated population, the marriages and births are under, and the deaths over the annual average for the preceding ten years. The excess in the death-rate is not altogether owing to the increased mortality which it implies, much of it being due to the improvement in registration effected through the Burial Returns obtained under the Public Health

TABLE I.—Showing for each of the years 1870–80, the estimated Population; the number of Marriages, Births, and Deaths registered, and the number of Emigrants enumerated, with the rates per 1,000 of the estimated Population represented thereby; and the averages for the ten years 1870–79.

YEARS.	Estimated Population in the middle of each year.*	Numbers Registered.			Number of Emigrants as returned by the Enumerators.	Rate per 1,000 of Estimated Population			
		Marriages.	Births.	Deaths.		Marriages.	Births.	Deaths.	Emigrants

(Ireland) Acts, 1878-9, the provisions of which, authorizing these Returns, had been put into operation in the course of the year 1879, and were in force during the whole of the year 1880.

The recorded natural increase of population, or excess of births over deaths was 25,180, the loss by emigration, amounting to 95,517, was greater than in any year during the previous ten years, and was double that of the preceding year; there would thus appear to have been a decrease of 70,337 in the population during the year, but against a portion of this decrease there is a set-off in immigration of which no official record has been obtained. The estimated population in the middle of the year was 5,189,080.

MARRIAGES.

The number of marriages registered during the year was 20,363 being 1 in every 255, or 3·92 per 1,000 of the estimated population.

This rate is below the low rate yielded by the average annual number of marriages registered during the ten years 1870-79, which was much under the marriage-rates in other countries, the statistics of which are available. The low marriage-rate in Ireland, as compared with other countries, must be largely attributed to the extensive emigration which takes place among persons of marriageable ages. No doubt there is some defect in the registration of Roman Catholic marriages, but a comparison of the birth-rate from year to year confirms the opinion that the marriage-rate is low. This subject has been more fully dealt with in the Reports for the year 1879 and previous years.

Of the 20,363 marriages registered during the year 1880, 13,494 were between Roman Catholics, 3,709 were celebrated according to the rites and ceremonies of the late Established Church; 2,283 were in Presbyterian Meeting-houses; 312 in "Registered Buildings" belonging to various religious denominations; only 549 by civil contract in the Registrars' offices; 12 were according to the usages of the Society of Friends, and 4 according to the Jewish rite.

TABLE II.—Marriages registered in Ireland in 1880 and each of the previous ten years, according to the modes of celebration; with the rate per 1,000 of the population represented:—

1879.	3,646	2,214	338	507	18	3	6,726	16,528	23,254	5·34	4·03	4·34
Average 1870-79.	4,099	2,526	319	570	11	2	7,526	18,321	25,847	6·03	4·49	4·83
1880.	3,709	2,283	312	549	12	4	6,869	13,494	20,363	5·63	3·40	3·92

Of the 3,709 marriages according to the rites of the late Established Church, 58 were by special licence, 3,161 by licence, 394 after the publication of banns, 10 on Registrar's certificate, and in 86 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1880 there were issued by the Registrars 672 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1880.	Number of Registered Meeting-houses on 31st December, 1880.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	123	559	2,155
2. Remonstrant Synod of Ulster,	10	19	48
3. Presbytery of Antrim,	4	8	10
4. United Presbytery or Synod of Munster,	3	2	
5. Northern Presbytery of Antrim,	2	6	16
Total,	142	594	2,229

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1880, there were 1,507 churches and chapels of the late Established Church, 594 registered Presbyterian Meeting-houses, and 310 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show an increase of 4 as regards the late Established Church, an increase of 3 Presbyterian Meeting-houses, and an increase of 1 "Registered Building."

The following statement shows the several religious bodies having "Registered Buildings" in 1880:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Wesleyan Methodists,	164	Church Methodists,	1
Reformed Presbyterians,	37	Covenanters,	1
Independents,	24	United Original Seceders,	1
Baptists,	19	"Protestant Dissenters,"	1
Primitive Wesleyan Methodists,	10	"Christians,"	1
Seceders,	12	Non-Subscribing Christians,	1
United Presbyterians,	8	Non-Subscribing Unitarians,	1
Methodists, New Connexion,	7	"The Catholic Apostolic Church,"	1
Moravians, or United Brethren,	6	Christian Brethren,	1
Primitive Methodists,	6	Independent Protestants,	1
Evangelical Union,	2	Jews,	1
Unitarians,	2		
Methodists,	2	Total,	310

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. In 1880, owing to the small number of Roman Catholic marriages, the difference was not as marked as usual, but still it was considerable. The numbers recorded were—in the first quarter, 6,232; in the second, 4,719; in the third, 4,593; and in the last, 4,819.

TABLE III.—The Number of Roman Catholic and of Other Marriages registered in each Quarter during the four years, 1877–80 :—

QUARTER ENDING THE LAST DAY OF	Years and Number of Marriages Registered.							
	1877.		1878.		1879.		1880.	
	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.
March, .	7,074	1,832	8,135	1,679	7,072	1,538	4,515	1,717
June, .	3,471	1,621	2,897	1,767	3,135	1,628	3,239	1,480
September, .	3,398	1,790	3,325	1,923	3,163	1,677	2,876	1,717
December, .	3,515	2,021	3,541	2,017	3,158	1,883	2,864	1,955
Total, .	17,458	7,264	17,898	7,386	16,528	6,726	13,494	6,869
General Total,	24,722		25,284		23,254		20,363	

The marriages of bachelors and spinsters constitute 84·7 per cent. of the total; those of widowers and spinsters 9·2 per cent.; of bachelors and widows 3·4 per cent.; and of widowers and widows 2·7 per cent. Thus, 12 in every 100 of the men married were widowers, and 6 per cent. of the women were widows; and in 15 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or "of full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1880 the ages of both parties were specified in only 5,202 instances, being little more than one-fourth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 20,363 men married during the year, 537, or 2·64 per cent. were minors; and of the women married, 2,400, or 11·79 per cent. were under age. These proportions differ but slightly from the averages for the preceding ten years.

The highest proportion of husbands (3·74 per cent.), and of wives (17·87 per cent.), married under age in 1880, was in the Western Division.

It may be added, that the per-centage of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1880, 15,033, or 73·8 per cent. of the husbands, and 14,064, or 69·1 per cent. of the wives, wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results eleven years since, the per-centage of persons married in 1870 who wrote their names being—men 62·8, and women 53·5.

As usual, the most favourable results appear in the Eastern or Metropolitan Division, and the least satisfactory in the Western and the North-Western Divisions, the number who wrote their names varying from 80 in every 100 men and 79 in every 100 women in the Eastern, to 64 per cent. of the men married in the Western, and the North-Western, and 60 per cent. of the women married in the Western division.

The number of marriages registered in each of the eleven years 1870–80; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given in the following table, for the several registration divisions:—

TABLE IV.—The Number of Marriages in the Eight Registration Divisions of Ireland* during the years 1870–80, and proportion per cent. of Persons who signed their Names, of Persons not of Full Age, and of Re-marriages.

Registration Divisions.*	Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.

1880	2,551	75·6	68·8	1·92	12·23	11·96	7·10	

In the province of Leinster, 77·1 per cent. of the men, and 77·6 per cent. of the women married wrote their names; in Munster, 75·1 per cent. of the men, and 69·3 per cent. of the women; in Ulster, 73 in every 100 men, and 64 in every 100 women; and in Connaught, only 64·8 per cent. of the men, and 60·6 per cent. of the women.

In 3,670 instances, both of the parties married signed the register by "mark," and in 4,289 cases the register was thus signed by either the husband or the wife, so that in 7,959 instances, or 39·1 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 12,404 instances, or 60·9 per cent., *both* parties wrote their names.

In proportion to the estimated population at all ages the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 4·9 per 1,000 persons; Ulster comes next, with 4·4 per 1,000; Munster third, with 3·3 per 1,000; and Connaught last, the rate being 2·6 per 1,000.

The highest rate in any county was 7·1 per 1,000, which was the marriage rate for Dublin; and the lowest 2·3 per 1,000 for Mayo. Between these, the most favourable were 6·0 for Antrim, 5·1 in Armagh, 4·9 in Down, 4·6 in Carlow, and 4·4 in Londonderry; and the least so 2·4 in Kerry; 2·6 in Galway; 2·7 in Leitrim; 3·1 in Donegal; and 3·2 in Longford.

BIRTHS.

The number of births registered during the year 1880 was 128,086—66,004 boys, and 62,082 girls, or 106·3 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 40·5, or 24·7 per 1,000, which is considerably under the low average rate (26·6 per 1,000) for the ten years, 1870–79, and less than the rate in any of those years.

In the report for the year 1875, the causes of the comparatively low birth-rate in Ireland were considered, and the observations then made are almost equally applicable to the year now under review:—

"It has been seen that the marriages *registered* in Ireland, when compared with the total population, fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking, but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the child-bearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcilable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 128,086 children whose births were registered in Ireland during the year 1880, 124,883, or 97·5 per cent., were legitimate, and 3,203, or 2·5 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·4.

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 64,415 were males, and 60,468 females, being 106·5 of the former to every 100 of the latter; and of the illegitimate children 1,589 were males, and 1,614 females, or 98·5 boys to 100 girls.

TABLE V.—The Per-centage of Legitimate and of Illegitimate Births registered in Ireland during the years 1876–80, by Divisions.

Divisions.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1876.	1877.	1878.	1879.	1880.	1876.	1877.	1878.	1879.	1880.

South Midland,	98·0	98·2	97·9	97·7	97·7	2·0	1·8	2·1	2·3	2·3
Western,	99·2	99·2	99·2	99·2	99·0	0·8	0·8	0·8	0·8	1·0
South-Eastern,	97·5	96·9	97·4	97·2	97·2	2·5	3·1	2·6	2·8	2·8
South-Western,	98·7	98·7	98·7	98·4	98·5	1·3	1·3	1·3	1·6	1·5

As in previous years, the lowest per-centage of children born out of wedlock was in the Western Division, and the highest in the North-Eastern division. The order of the several divisions is as follows:—Western 1·0 per cent. of total births; North Midland and South-Western, 1·5; Eastern, 2·1; South Midland, 2·3; North-Western, 2·6; South-Eastern, 2·8; and North-Eastern, 4·9.

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 4·0; in Leinster, 2·2; in Munster, 1·8; and in Connaught, 1·0.

The extremes of the county rates are found in Down and Leitrim. In the former of 5,440 births registered, 287, or 5·3 per cent. were illegitimate, and in the latter, out of 1,878 births recorded, only 15, or 0·8 per cent., were so classed.

The respective total birth-rates for the provinces in 1880 were—Munster, 25·6 per 1,000 of the population; Leinster, 25·2 per 1,000; Ulster, 24·4; and Connaught, 23·8.

The four counties having the highest rates were—Dublin, 29·7 per 1,000 inhabitants; Antrim, 29·6; Kerry, 26·8; and Limerick, 26·6. Those with the lowest rates were—Wicklow, 20·4; Monaghan, 21·0; Fermanagh, 21·2; and Tyrone, 21·4 per 1,000 persons.

Of the total births, 54·8 per cent. were registered in the first six months of the year (182 days), and 45·2 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 35,259; in the second, 34,963; in the third, 30,334; and in the fourth, 27,530.

TABLE VI.—Showing, by Quarterly Periods, the number of Births registered in Ireland in each of the five years 1875–79, and the average number for that period; also the number registered during each quarter of the year 1880:—

DEATHS.

The deaths registered during the year amount to 102,906, being equal to 1 in 50·4 or 19·8 per 1,000 of the estimated population. The deaths

of males number 51,640, and those of females 51,266, the former being equal to 20·4 in every 1,000 males living, and the latter representing 19·0 per 1,000 females.

The registered deaths are much over the average for the ten years 1870-79, and more numerous than in any year during that period except 1879. As already stated, much of this increase is owing to improved registration, the Burial Returns obtained under the new Public Health Acts bringing under the notice of the Registrars very many deaths which, but for these Returns, would have remained unregistered.

The recorded mortality from zymotic diseases was 6 per cent. over the average for the preceding ten years, but a portion of this increase is owing to the more complete registration effected.

The deaths from the eight principal zymotic diseases* registered during 1880 form 11·8 per cent. of the deaths from all causes, and are equal to 233 in every 100,000 persons living; the average annual mortality from the same diseases in the preceding 10 years represents 12·0 per cent. of the average number of deaths from all causes, and is equal to 211 deaths in every 100,000 of the estimated mean population.

As heretofore very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this department, and, emanating as they did, from gentlemen qualified to speak decisively on the subject, it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts. In this place it will be sufficient to say that the Registrars' observations, while disclosing many lamentable defects in sanitation, point to a gradually extending interest in sanitary questions which must, ere long, be productive of lasting good.

The death-rates in the eight divisions range from 15·6 per 1,000 persons in the Western to 26·0 in the Eastern. The following is the order of the several divisions:—Western, 15·6 per 1,000 persons; North-Western, 18·0; North-Midland, 18·2; South-Midland, 19·3; South-Western, 19·5; North-Eastern, 19·9; South-Eastern, 21·0; and Eastern, 26·0.

With respect to the four provinces, the rate for Connaught is only 15·3; that for Munster is 19·5; for Ulster, 20·0, and for Leinster, 23·3.

Of the thirty-two counties, the four having the lowest registered mortality are—Mayo, only 14·5 per 1,000; Sligo, 15·3; Galway, 15·6; and Roscommon, 15·8.

Those in which the rate was highest are—Dublin, 31·7; Waterford, 24·9; Louth, 22·6; and Antrim, 21·9.

The deaths registered in the first half of the year always largely outnumber those in the second. In 1880 57·6 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 42·4 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 23·6 per 1,000 of the population; second, 22·1; third, 16·5; and fourth, 17·1.

* Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Fever, Diarrhoea, and Cholera.

TABLE VII.—Showing, by Quarterly Periods, the number of Deaths registered in Ireland in each of the five years, 1875–79, and the average number for that period; also the number registered during each quarter of the year 1880:—

QUARTER ENDING	Years and Number of Deaths Registered.							Equivalent Annual Rate per 1,000 of Estimated Population.

CAUSES OF DEATH.

I.—ZYMOTIC DISEASES.

The deaths from Zymotic diseases registered during the year 1880 amounted to 15,898, or 306·37 in every 100,000 of the estimated population. This rate is over the average for the ten years 1870–79.

Compared with the ten-year average there was a decline in the mortality from each of the principal diseases in this class except scarlatina, whooping-cough, fever, and diarrhoea; the deaths from the last named disease show an increase of 597.

Deaths from measles, which amounted to 860 in 1879, rose in 1880 to 1,025, and deaths from scarlatina which having gradually declined from 4,034 in 1874 to 1,079 in 1878, rose to 1688 in 1879, further rose to 2,443 in 1880; the last number, however, is only 82 over the average for the preceding ten years.

Compared with the year 1879, there was an increase in deaths from zymotic diseases in all the Divisions. The respective rates for the several Divisions are:—Eastern, 524·02 in every 100,000 of the estimated population; South-Western, 391·34; North-Eastern, 268·58; South-Eastern, 299·37; South Midland, 231·23; Western, 217·10; North-Western, 216·11; and the North Midland, 207·39.

Of the 15,898 deaths from zymotic diseases, 9,857 or 62·0 per cent. were amongst children under 10 years of age, being equal to a mortality of 8 in every 1,000 children of that age.

TABLE VIII.—Showing, by DIVISIONS, the Number of Deaths from the principal Zymotic Diseases and from all diseases of that class registered in Ireland during the Ten Years 1870-79; the Average Annual Number for that period; with the Number registered in 1880, and the Rate represented thereby.

Small-pox.—There were 389 deaths from small-pox registered, being 330 under the number in 1879, and 484 less than in 1878. Of the deaths from this disease in 1880, 297 were in the Eastern Division (including 84 in the North Dublin and 189 in the South Dublin Union), 37 occurred in the North-Eastern Division (including 25 in Ballymena Union), 22 in the South-Midland, 17 in the North-Western, 9 in the North-Midland, 4 in the Western, 2 in the South-Western, and 1 in the South-Eastern Division. In the year 1876 only 24 deaths from this cause were recorded, and in 1877 only 71, but the average annual number for the ten years 1870-79 was 719.

In the province of Leinster the deaths numbered 324; in Ulster 55; in Munster 8; and in Connaught 2.

Measles.—Deaths from measles, which fell from 2,212 in 1878 to 860 in the following year, amounted to 1,025 in 1880; this number is equal to an annual mortality of 19·75 per 100,000 persons. The disease was most fatal in the South-Western and Eastern Divisions, the annual rates per 100,000 persons for these divisions being respectively 50·31 and 44·18.

Scarlet Fever.—The deaths from this disease number 2,443, or 47·08 per 100,000 persons, against an average for the preceding ten years of 2,361 deaths. In all the Divisions, except the North-Eastern, North-Midland, and Western, the deaths were above the average; the total number for the year is 755 in excess of the number in 1879.

The deaths from scarlet fever in 1880 were distributed through the four provinces as follows:—Leinster, 993; Munster, 935; Ulster, 409; and Connaught, 106.

Diphtheria.—This disease proved fatal in 314 instances, being 6 under the number in the previous year, and 14 under the annual average for the 10 years 1870-79. In proportion to population the highest mortality (8·80 per 100,000 persons), was in the North-Eastern Division, and the lowest (0·85) in the North Midland.

Quinsy.—This disease caused 251 deaths against 224 in the year 1879.

Croup.—The deaths from croup registered during the year 1880 numbered 1,398 (708 males, and 690 females); being 205 in excess of the number for the preceding year.

Whooping-cough.—The deaths (2,371) from whooping-cough are 634 in excess of the average for the ten years 1870-79, and 433 over the number registered in the year 1879; they afford an annual rate of 45·69 per 100,000 of the estimated population. In proportion to population the mortality was highest in the Eastern and North-Eastern Divisions, the rates being 78·66 and 65·75 per 100,000 persons respectively.

Fever.—The number of deaths from the several forms of continued fever amounted to 3,100 (1,530 males and 1,570 females), equal to a mortality of 59·74 per 100,000 of the population; the average annual number for the previous ten years was 2,998; the number in 1879 was 2,862. The highest divisional rate per 100,000 persons in 1880 was 79·88 for the South-Western Division, and the lowest was 43·02 for the North-Western Division.

There were 15 Superintendent Registrars' Districts in which the deaths from fever equalled 1 per 1,000 of the population, viz.:—Inishowen, in the North-Western Division; Dublin North, and Dublin South, in the Eastern; Roscommon, in the North-Midland; Cashel, in the South-Midland; Belmullet, Clifden, Galway, Oughterard, and Swineford, in the Western; Clogheen and Dungarvan, in the South-Eastern; and Cork, Glin, and Kanturk, in the South-Western.

In Leinster there were 788 deaths, or 0·63 per 1,000 inhabitants; in Munster 930, or 0·70 per 1,000; in Ulster 852, or 0·49; and in Connaught 530, or 0·65 per 1,000.

Of the registered deaths from fever, 934 were ascribed to typhus, 1,087 to typhoid or enteric, and 1,079 to simple continued fever, or vaguely as to "fever." The age periods 15 and under 20 years, and 20 to 25, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 79·98 per 100,000, and the latter 90·25. The lowest rate was 41·31 for the period "under 5 years old."

TABLE IX.—Showing for the year 1880 the Deaths from the several forms of Fever at each Age-Period, with the proportion to the estimated number living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 248, being 53 under the annual average for the preceding decade. In the year 1879 the number was 259. The highest mortality in 1880 in proportion to the population was in the Eastern Division, and the lowest in the South-Midland.

Metria or Puerperal Fever.—The number of deaths from this disease registered in 1880 was 347, being 7 more than in the preceding year. The average annual number for the ten years 1870–79 was 356.

Influenza.—Sixty-nine deaths were ascribed to this disease; the number in 1879 was 74, and the annual average for the ten years 1870–79 was 107.

Dysentery.—To this disease 224 deaths were attributed, being 76 more than in the previous year, but 29 under the annual average for the ten years 1870-79.

Diarrhœa.—The deaths from diarrhœa were much above the average. The disease proved fatal in 2,395 instances, equal to a mortality of 46·15 per 100,000 of the estimated population; the deaths in 1879 numbered 1,526, and the average annual number for the ten years 1870-79 was 1,798. The highest Divisional rate in 1880 was 78·27 for the Eastern Division, and the lowest 18·18 for the North-Western.

The rates for the provinces were as follow:—Leinster, 58·9 per 100,000 persons; Munster, 55·5; Ulster, 45·4; and Connaught only 14·4.

Of the 2,395 deaths from diarrhœa, 462 were registered in the first quarter, 431 in the second, 944 in the third, and 558 in the fourth.

Simple Cholera.—Sixty-seven deaths were ascribed to this disease.

Eight males aged respectively 2, 7, 8, 16, 39, 45, 49, and 62 years, and four females aged respectively 8, 8, 11, and 36 years, died from *Hydrophobia*.

II.—CONSTITUTIONAL DISEASES.

From diseases termed “constitutional” there resulted 17,866 deaths (8,444 males, and 9,422 females), affording a rate of 1 in 5·8 of all the deaths, and equal to 344 in every 100,000 of the population. This mortality is 718 in excess of that for the previous year, and 1,120 over the average for the ten years 1870-79.

Phthisis or Pulmonary Consumption proved fatal in 11,124 instances—5,193 males, and 5,931 females—being equal to 214·37 in every 100,000 persons; the average annual number for the previous ten years was 10,239.

As heretofore the North-Eastern and the Eastern Divisions yield the highest rates, and the Western the lowest. The rates for these three Divisions are—North-Eastern 285·75 in every 100,000 living; Eastern, 275·32; and Western, 128·48.

The rates for the four provinces are as follow:—Ulster, 259 per 100,000 of the population; Leinster, 247; Munster, 174; and Connaught, 143.

Of the total deaths from phthisis, 7,824, or 70·3 per cent, were of persons between 15 and 45 years of age.

In the first quarter there were 3,043 deaths registered; in the second 3,395; in the third 2,465; and in the fourth, 2,221.

TABLE X.—Showing, by DIVISIONS, the Number of Deaths from Phthisis or Pulmonary Consumption registered in Ireland during the Ten Years 1870-79; the Average Annual Number for that period; with the number registered in 1880, and the Rate represented thereby.

Mesenteric Disease.—The deaths from Mesenteric disease numbered 1,678—787 males and 891 females.

Hydrocephalus or Water on the Brain.—The deaths from this disease amounted to 1,158—646 males, and 512 females.

Scrofula.—To this disease 975 deaths were ascribed (529 males and 446 females).

Gout.—Only 29 deaths from Gout were registered (18 males and 11 females).

Cancer.—This disease caused 1,775 deaths, of which 797 were those of males, and 978 of females.

Dropsy.—Under this heading 956 deaths were tabulated (395 males and 561 females).

III.—LOCAL DISEASES.

The number of deaths from "local diseases" registered amounted to 35,297 (19,051 males and 16,246 females), or 1 in 2.9 of the deaths from all causes; in 1879 the number was 38,021 (20,221 males and 17,800 females).

Diseases of the Nervous System.—From this group of diseases there resulted 9,004 deaths (4,959 males and 4,045 females), being 136 over the number in the year 1879. They include 3,992 from convulsions (nearly all children), 1,389 from paralysis, 979 from apoplexy, 860 from cephalitis or inflammation of the brain, 348 from epilepsy, 350 from insanity, 7 (1 male and 6 females) from chorea or St. Vitus's dance, and 1,079 deaths (including 228 from necrencephalus or softening of the brain, and 169 from spinal marrow disease) entered under "brain disease, &c."

Diseases of the Organs of Circulation.—Diseases of the Circulatory Organs caused 4,238 deaths (2,232 males and 2,006 females); in the previous year the number was 4,534. "Heart disease" caused 4,066 deaths, aneurism 80, and pericarditis or inflammation of the heart's covering, 92.

*Diseases of the Respiratory Organs.**—The deaths from these diseases amounted to 15,740 (8,269 males and 7,471 females), being equal to 303·33 in every 100,000 of the population. The average number for the preceding ten years was 14,040, the annual numbers varying from 14,568 in 1875 to 18,441 in 1879.

As in 1879 the Eastern Division had the highest rate, and the Western the lowest; the rate for the former division was 418·74 per 100,000 persons, and for the latter 210·16. Diseases of the respiratory organs were most fatal in the first quarter of the year, during which 5,380 deaths from these causes were registered; the number for the second quarter was 4,584; for the third 2,353; and for the fourth 3,423. As many as 11,701 of the deaths from these causes (5,858 males and 5,843 females) resulted from bronchitis; 2,263 (1,446 males and 817 females) were from pneumonia or inflammation of the lungs; 330 from asthma; 297 from pleurisy; 92 from laryngitis; and 1,057 were returned as from "lung disease," &c.

TABLE XI.—Showing, by DIVISIONS, the Number of Deaths from Diseases of the Respiratory Organs* registered in Ireland during the Ten Years 1870–79; the Average Annual Number for that period; with the number registered in 1880, and the Rate represented thereby.

Diseases of the Digestive Organs.—These diseases contributed 4,331 deaths (2,282 males and 2,049 females). They include 376 from gastritis or inflammation of the stomach; 504 from enteritis or inflammation of the bowels; 331 from peritonitis or inflammation of the covering of the bowels; 339 from ileus or obstruction of the bowels; 219 from ulceration of the intestines; 150 from hernia; 7 (6 males and 1 female) from fistula; 750 entered under "stomach disease, &c."; 239 (130 males and

* Exclusive of Phthisis or Pulmonary Consumption, for which see "Constitutional Diseases."

109. females) from hepatitis or inflammation of the liver; 151 from jaundice; 950 (including 174—118 males and 56 females—from cirrhosis) entered under "liver disease, &c."; and 24 from spleen disease.

Diseases of the Urinary Organs.—To the various affections of this order of diseases 1,430 deaths (1,071 males and 359 females) were ascribed. Of these deaths, 443 (291 males and 152 females) were from nephria or Bright's disease, 98 from diabetes, 107 from cystitis or inflammation of the bladder; 106 from nephritis or inflammation of the kidneys; 40 from ischuria or suppression of the secretion of urine; 21 from stone in the bladder; and 615 (of which 165 were ascribed to prostatic disease) entered under "kidney disease, &c."

Diseases of the Organs of Generation.—Deaths from diseases of the organs of generation numbered 138, including 80 from ovarian dropsy, 58 from diseases of the uterus, &c.

Diseases of the Organs of Locomotion proved fatal in 254 instances, and *Diseases of the Integumentary System* in 162; of the latter number of deaths, 4 were caused by phlegmon, 70 (35 males and 35 females) by ulcer, and 88 by various skin diseases.

IV.—DEVELOPMENTAL DISEASES.

The number of deaths from this class of diseases in 1880 amounted to 29,766 (13,976 males and 15,790 females). Of the 673 deaths from the first order of these causes, 238 were ascribed to premature birth, 398 to teething, 7 to cyanosis, 19 to spina bifida, and 11 to other malformations.

The deaths registered from the accidents of childbirth amounted to 544; the average annual number for the previous ten years was 585. If to these 544 deaths registered in the year 1880, the deaths from metria (347) be added, we have a total of 891 deaths of parturient women, or the death of one mother to every 144 births registered during the year; the average annual number for the ten years 1870-79 was 948, being equal to 1 in every 151 of the average annual number of births registered. Twenty-one deaths were tabulated under the head of paramenia.

The remaining deaths in this class are 22,473 (10,655 males and 11,818 females) from "old age," and 6,055 from atrophy and debility.

V.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 1,975 (1,378 males and 597 females), or 38.06 in every 100,000 of the population, being slightly under the average for the ten years 1870-79. Accidents or negligence caused 1,738 of these deaths (including 614 from fractures and contusions, 389 from burns or scalds, and 432 from drowning), there were 101 cases of homicide (murder and manslaughter), 100 of suicide, 2 executions, and 34 violent deaths which being vaguely returned were not classed.

TABLE XII.—Showing, by DIVISIONS, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths), registered during the Ten Years 1870-79; the Average Annual Number for that period, with the number registered in 1880, and the Rate represented thereby.

Inquests.—There were 2,595 inquests reported to the Registrars during the year 1880, being 1 inquest to every 40 deaths registered.

In 253 instances of sudden death the cause was not ascertained.

In 1865 there was 1 death in every 19 registered which could not be classed, owing to the cause of death having been either ill-defined or unspecified; in 1880 such deaths only equalled 1 in every 56.

AGES.

Deaths of infants under 1 year old numbered 14,386, being equal to 11.2 per cent. of the number of births registered.

Amongst children under 5 years of age 26,320 deaths occurred—a mortality equal to 41.7 in every 1,000 of the living at that age. Of these, 13,936 were boys and 12,384 girls; the former number representing 43.4 in every 1,000 boys, and the latter 39.8 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 10 per cent. of the living at that age.

Amongst the deaths registered are 819 of persons stated to have been aged 95 years and upwards—377 males and 442 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1880 amounted to 95,517; of these, 49,937 were males and 45,580 females. Of the whole number, 16,169 were from Leinster; 30,654 from Munster; 28,122 from Ulster; and 20,519 from Connaught.

Of the emigrants in 1880, 14·3 per cent. were under 15 years of age; 75·7 per cent. were between 15 and 35 years old; and 10·0 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The average prices, in Dublin, of bread, oatmeal, potatoes, and beef in 1880 were slightly over those for the preceding year. The average price of Messrs. Manders and Co.'s 4-lb. loaf was 7½*d.*, being ½*d.* over the average price in the year 1879; oatmeal averaged 15*s.* 5*d.* per cwt., being 1*s.* 2*d.* over the mean price for 1879. The average prices of potatoes ranged from 4*s.* 2*d.* to 7*s.* 4*d.* per cwt., against 4*s.* 0*d.* to 6*s.* 9*d.* in 1879; and those of beef from 64*s.* 0*d.* to 72*s.* 6*d.* per cwt., against 57*s.* to 68*s.*

TABLE XIII.—AVERAGE PRICES IN DUBLIN OF BREAD, OATMEAL, POTATOES, and BEEF, during the years 1870-80, and the AVERAGE NUMBER OF PERSONS IN IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1880.

Surveying the period covered by the several Tables in this Report, *i.e.*, 1880, and the ten years preceding, it is found that beef was lowest in the year 1870, when the average prices ranged from 54s. 6d. to 68s. 6d. per cwt.; bread in 1870, in which the average price of Messrs. Manders' 4lb. loaf was 6 $\frac{3}{4}$ d.; oatmeal in 1879, when the average price was 14s. 3d. per cwt., and potatoes in 1875, when the average range of prices was from 2s. 11d. to 4s. 7d. per cwt. The highest average price of bread was 8d. in the years 1872-3-4-7; of oatmeal, 18s. 8d. in 1874; the highest range for potatoes, 4s. 6d. to 8s. per cwt. in 1873, and for beef, 64s. to 82s. 6d. per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1880 was 54,610, being 2,547 over the average for the preceding year; and that the average number of persons receiving out-door relief was 57,014, or 17,793 over the corresponding number for 1879.

THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken during the years 1870-80, at 40, Fitzwilliam-square, West, Dublin, by J. W. Moore, M.D., Univ. Dub., F.K.Q.C.P., Observer at Dublin for the Meteorological Office, London.

The mean Atmospheric Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's Formula, *viz.*, *min.* + {*max.* - *min.* × .41} = *Mean Temperature*. The per-centage Amount of Cloud has been deduced from observations made three times daily—at 9 A.M., 3 P.M., and 9 P.M.—for the years 1870-1874 inclusive, and from observations made twice daily—at 9 A.M. and 9 P.M.—for the years 1875-1880 inclusive. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least one-hundredth (.01) of an inch of rain fell within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1880 was 29.964 inches. The highest observed reading was 30.676 inches, at 9 A.M. on January 21st. The lowest observed reading was 28.373 inches, at 4.15 P.M., on February 16th. The extreme range of atmospherical pressure was, therefore, 2.303 inches.

The *Mean Temperature* of the year, deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's formula, was 48.9°. The highest reading was 74.8° on September 4th; the lowest reading was 20.1° on January 22nd. The average mean temperature for the years 1870-79 calculated in the same way, was 48.8°. The mean temperature, deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M., was 49.4°.

Rain fell on 188 days, including snow or sleet on 18 days, and hail on 27 days. The average number of rainy days in the years 1870-79 was 198.7. The total rainfall measured 34.512 inches, compared with an average of 28.468 inches in the years 1870-79. Of this amount only 11.118 inches, or scarcely one-third, fell in the first six months of the year, on 88 days.

As regards the *Direction of the Wind*, 732 observations were made during the year, with this result—N., 41; N.E., 54; E., 95; S.E., 56; S., 45; S.W., 99; W., 201; N.W., 72; Calms, 69.

From nearly every point of view, the year 1880 must be regarded as much more favourable than its predecessor. In January atmospheric pressure was unusually high, the mean being 30·307 inches. The twenty days ending the 27th were persistently cold, but the rain-fall and number of rainy days were considerably under the average. February and March were open months. Damp foggy weather was very prevalent in the latter month. April was showery, with a mean temperature slightly below the average. May was very fine and dry, with frequent sunshine and a preponderance of polar winds. June was a favourable month, of average mean temperature but without any extreme heat. July was remarkable for the number of "thunderstorm depressions" which passed over the British Islands, and for the frequency and severity of the accompanying showers. August opened indeed with broken weather, but eventually proved remarkably fine and summerlike. September was on the whole characterised by favourable weather. Saturday, the 4th, was the warmest day experienced in 1880. October was signalised by an almost persistent low mean temperature, and by an extraordinarily heavy rainfall in Dublin. On the 27th 2·736 inches of rain fell in the city. November was stormy, and sudden and great changes of temperature often occurred. The first half of December was singularly mild and open, but the second half was cold and changeable.

A general review of the year 1880 shows that the annual mean temperature was only a shade above the average (48·9° compared with 48·8°); the amount of cloud was very slightly below the average (60·5 per cent. compared with 60·9 per cent.); the rainfall was considerably above the average (34·512 inches compared with 28·468 inches); but the number of rainy days fell decidedly short of the average, being only 188 compared with 198·7.

TABLE XIV.—Showing the average Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the Ten Years 1870—1879 inclusive; and the Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the year 1880.

[For detailed Table for 1880, see page 32.]

At the close of the year it became the duty of this department to make arrangements for the taking of the Census of 1881, which has put a great strain on the resources of the establishment, and throughout delayed the compilation of this report. Another onerous duty had to be discharged at the end of the year 1880 in maturing preparations for enforcing the

new Births and Deaths Registration Act (43 & 44 Vic., cap. 13), appointed to commence on the 1st of January, 1881. The results of the working of this Act will be shown in the report for the year 1881, and very considerable improvements in the working of the Registration Acts are anticipated in consequence of the amendment of the law by this important piece of legislation.

This report is the last for the decade 1871–80, which is the first complete decade since registration of Births and Deaths commenced in Ireland in 1864, terminating with the decennial period selected for the taking of the census. I shall, therefore, have the honour to submit to your Excellency a supplement to this report, containing a summary of the results of registration during the ten years 1871–80, compiled on principles similar to those hitherto followed by the Registrar-General for England.

I hope soon to have this summary put in hands, and to present it to your Excellency as soon as possible.

I have the honour to be

Your Excellency's faithful servant,

THOS. W. GRIMSHAW,

Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
Dublin, 9th January, 1882.

METEOROLOGICAL OBSERVATIONS

TAKEN AT

40, FITZWILLIAM SQUARE, WEST, DUBLIN, IN 1880.

By J. W. MOORE, Esq., M.D., UNIV. DUB., F.K.Q.C.P.

Meteorological Observations.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS taken at 40, Fitzwilliam-square, West, Dublin, during the year 1880, by J. W. MOORE, M.D., UNIV. DUB., F.K.Q.C.P.

Long. 6° 15' W.; Lat. 53° 20' N.; Height above Mean Sea Level, 51 feet; Thermometers, 4 feet above ground; Rain Gauge, 3 feet 4 inches above ground.

Topographical Description of the Eight Divisions into which Ireland has been divided for Statistical purposes.

No. I., THE NORTH-EASTERN DIVISION.—This division may be described by a line passing southward from Lough Foyle through the counties of Londonderry, Tyrone, and Armagh, to Lough Bawn, in the county of Monaghan, and thence eastward to Carlingford Lough; the north and east being on the seaboard.

No. II., THE NORTH-WESTERN DIVISION, is bounded on the east by the division just described, from Lough Foyle to a point a little south of Six Mile Cross, in the county of Tyrone, and may be described by a line drawn thence S.W. through the county of Fermanagh to the south of Enniskillen, embracing that portion of the north-west angle of the county of Cavan belonging to the Enniskillen Union, into the county of Leitrim, crossing Lough Allen, thence into the county of Sligo, to a point situated to the southward of the town of Ballymote, and thence extending north to Ballysodare Bay; the remainder of the division is bounded by the sea. It contains Loughs Erne and Derg, and part of Lough Allen, and large portions of it are mountainous.

No. III., THE EASTERN DIVISION, is situated in the provinces of Leinster and Ulster; it extends along the Irish Sea and St. George's Channel, from Warrenpoint, in the county of Down, to the south of Cahore Point, in the county of Wexford, stretching inland about twenty-five miles, and embracing the counties of Louth, Dublin, and Wicklow, and portions of the counties of Carlow, Cavan, Kildare, Meath, and Wexford; together with small portions of the counties of Armagh and Monaghan.

No. IV., THE NORTH MIDLAND DIVISION, is situated in the provinces of Leinster, Ulster, and Connaught, and extends southward from its junction with the "North-Western" division near Six Mile Cross, in the county of Tyrone, to Tyrrellspass, in the county of Westmeath. Virginia, in the county of Cavan, is situated on its eastern border, and Tulsk, in the county of Roscommon, on its western.

No. V., THE SOUTH MIDLAND DIVISION, situated in the provinces of Leinster and Munster, extends from the Hill of Down, in the county of Meath, southward to Borris, in the county of Carlow. Its southern boundary may be described by a line drawn thence to New Birmingham, in the county of Tipperary, and from that point south to Fethard, in the same county, thence westward to the northern base of the Galty mountains, and in a north-westerly direction, to Pallasgreen, in the county of Limerick. On the east it is bounded by the "Eastern" division, and on the west by the "Western" and the "South-Western" divisions.

No. VI., THE WESTERN DIVISION.—This division extends southwards from Sligo and Killala Bays to the northern bank of the River Shannon, lying westward of Limerick; the extreme points, north and south, being Benwee Head, in the county of Mayo, and Loop Head, in the county of Clare, a distance in or about 120 miles, which, however, does not represent the extent of seaboard, the western coast being indented by numerous bays and inlets. This division has been extended much more inland than the eastern division, as from its exposure to the Atlantic Ocean, and the prevalence of westerly winds (which blow for nearly three-fourths of the year), the climate must be affected for a considerable distance inland; the Unions situated on the extreme east are Boyle, Castlereagh, Glennamaddy, Mountbellew, Ballinasloe, and Portumna.

No. VII., THE SOUTH-EASTERN DIVISION.—This division extends from its junction with the "Eastern" division, southward of Cahore Point, in the county of Wexford, along the eastern and southern coasts to the east of Cork Harbour, and is bounded on the north by the "South Midland" division. It embraces the county of Waterford, nearly the whole of the county of Wexford, parts of the counties of Carlow, Kilkenny, and Tipperary; that portion of the county of Limerick (38,550 acres) comprised in the Mitchelstown Union, and a portion of the eastern side of Cork county.

No. VIII., THE SOUTH-WESTERN DIVISION, extends along the southern and western coasts from Cork Harbour to the River Shannon, and embraces the county of Kerry, nearly the whole of the counties of Corx and Limerick, and a small portion of the county of Clare, comprised in the Limerick Union.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port)
estimated to the middle of each of the Years 1801 to 1880, inclusive:—

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1824 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872-80—By adding the births registered in the year to the population for each preceding year, and subtracting the registered deaths and the number of emigrants, allowances being made in each year for the excess in the number thus arrived at in 1880 over the population (unrevised) according to the Census of 1881.

ANNUAL ABSTRACTS
OF
MARRIAGES, BIRTHS, AND DEATHS.

1880.

ABSTRACT OF MARRIAGES.—Marriages registered in Ireland, pursuant to the

DIVISIONS AND SUPERINTENDENT REGISTRARS' DISTRICTS.*	AREA in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Popula- tion, 1871.	TOTAL MARRIAGES.	MARRIAGES																
				Registered under the Act 7 & 8 Vic., c. 81.

NOTE.—The Registrars' Districts are sub-divisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, less than the deaths, to the extent stated.

IRELAND.—SUPPLEMENTARY TABLE of the

[In the Tables of Causes of Deaths, pp. 102-109, all the Diseases, either having a distinct character, or fatal to any considerable number of persons, are classified under 116 heads; some of which, however, include groups of very distinct diseases,—such as are fatal to only a few persons, or diseases which are often confounded with other diseases. The rule has been to refer the distinct diseases to heads under which the cases were so numerous that the additional numbers would not interfere with the calculated proportions. Where it is desired

INDEX TO SUPERINTENDENT REGISTRARS' DISTRICTS

[The following Index furnishes a reference to the *Number* of each Superintendent Registrar's District in the Topographical Arrangement adopted in the Tables of Abstracts contained in the Report, in which the numbers run consecutively from 1 to 163.*]

A.		Dublin, North,	45	Millstreet,	158
Abbeyleix,	75	Dublin, South,	46	Mitchelstown,	153
Antrim,	1	Dundalk,	47	Mohill,	69
Ardee,	38	Dunfanaghy,	24	Monaghan,	70
Armagh,	2	Dungannon,	12	Mountbellew,	113
Athlone,	57	Dungarvan,	127	Mountmellick,	84
Athy,	76	Dunmanway,	147	Mullingar,	71
B.		Dunshaughlin,	48	N.	
Ballieborough,	39	E.		Naas,	51
Ballina,	92	Edenderry,	82	Navan,	52
Ballinasloe,	93	Ennis,	104	Nenagh,	85
Ballinrobe,	94	Enniscorthy,	123	Newcastle,	159
Ballycastle,	3	Enniskillen,	25	Newport,	114
Ballymahon,	58	Ennistimon,	105	New Ross,	134
Ballymena,	4	F.		Newry,	19
Ballymoney,	5	Fermoy,	129	Newtownards,	20
Ballyshannon,	21	G.		O.	
Ballyvaghan,	95	Galway,	106	Oldcastle,	72
Balrothery,	40	Glennamaddy,	107	Omagh,	34
Baltinglass,	41	Glenties,	26	Oughterard,	115
Banbridge,	6	Glin,	148	P.	
Bandon,	139	Gorey,	49	Parsonstown,	86
Bantry,	140	Gort,	108	Portumna,	116
Bawnboy,	59	Gortin,	27	R.	
Belfast,	7	Granard,	66	Rathdown,	53
Belmullet,	96	I.		Rathdrum,	54
Borrisokane,	77	Inishowen,	28	Rathkeale,	160
Boyle,	97	Irinestown,	29	Roscommon,	73
C.		K.		Roscrea,	87
Cahersiveen,	141	Kanturk,	149	S.	
Callan,	123	Kells,	50	Scarriff,	117
Carlow,	78	Kenmare,	150	Shillelagh,	55
Carrickmacross,	42	Kilkeel,	13	Skibbereen,	161
Carrick-on-Shannon,	60	Kilkenny,	83	Skull,	162
Carrick-on-Suir,	124	Killadysert,	109	Sligo,	35
Cashel,	79	Killala,	110	Strabane,	36
Castlebar,	98	Killarney,	151	Stranorlar,	37
Castleblayney,	8	Kilmaothomas,	130	Strokestown,	74
Castlecomer,	80	Kilmallock,	152	Swineford,	118
Castlederg,	22	Kilrush,	111	T.	
Castlereagh,	99	Kinsale,	153	Thomastown,	135
Castletown,	142	L.		Thurles,	88
Cavan,	61	Larne,	14	Tipperary,	89
Celbridge,	43	Letterkenny,	30	Tobercurry,	119
Claremorris,	100	Limavady,	15	Tralee,	163
Clifden,	101	Limerick,	154	Trim,	56
Clogheen,	125	Lisburn,	16	Tuam,	120
Clogher,	62	Lismore,	131	Tulla,	121
Clonakilty,	143	Lisnaskea,	67	Tullamore,	90
Clones,	63	Listowel,	155	U.	
Clonmel,	126	Londonderry,	31	Urlingford,	91
Coleraine,	9	Longford,	68	W.	
Cookstown,	10	Loughrea,	112	Waterford,	136
Cootehill,	64	Lurgan,	17	Westport,	122
Cork,	144	M.		Wexford,	137
Corrofin,	102	Macroom,	156	Y.	
Croom,	145	Magherafelt,	18	Youghal,	138
D.		Mallow,	157		
Delvin,	65	Manorhamilton,	32		
Dingle,	146	Middleton,	132		
Donaghmore,	81	Millford,	33		
Donegal,	23				
Downpatrick,	11				
Drogheda,	44				
Dromore West,	103				

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "Abstract of Marriages" to the Superintendent Registrar's District, numbered 75 (see page 38), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX TO REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
