### 2. Sex, Age Group and Marital Status

Males and females are classified by single year of age up to 18 years (19+ = 19 years of age and over).

The total population is classified by sex, marital status and five-year age groups. The details shown for 'Married' include both persons in a first marriage and those who were re-married but exclude ever-married persons who at the time of the census were deserted, separated or divorced or whose marriages were annulled. All of these categories are included under 'Separated'.

### 3. Households, Family Units and Family Cycle

The classification of households distinguishes between 'Private' (Permanent and Temporary) and 'Non-Private' households.

#### Private Households

A *private household* comprises either one person living alone or a group of people (not necessarily related) living at the same address with common housekeeping arrangements – that is, sharing at least one meal a day or sharing a living room or sitting room. In order to be included

in the household, a person must be a usual resident at the time of the census. Therefore, visitors to the household on census night are excluded, while usual residents temporarily absent (for less than 3 months) are included.

A *permanent private household* is a private household occupying a permanent dwelling such as a dwelling house, flat, apartment or bedsitter.

A *temporary private household* is a private household occupying a caravan, mobile home or other temporary dwelling and includes travelling people and homeless persons living rough on census night.

### **Non-private Household (Communal Establishment)**

A *non-private household* is a group of persons enumerated in a boarding house, hotel, guest house, hostel, barrack, hospital, nursing home, boarding school, religious institution, welfare institution, prison or ship, etc. A non-private household may include usual residents and visitors. However, proprietors and managers of hotels, principals of boarding schools, persons in charge of various other types of institutions and members of staff who, with their families, occupy separate living accommodation on the premises are classified as private households.

Family units and members of family units are classified by age group of the youngest child up to 19 years (20+ = 20 years of age and over).

### **Persons Living Alone**

"Persons Living Alone" are classified by sex and age group. The number of two-person private households where both persons are aged 65 years and over is also shown.

### **Reference Person**

The term "Reference Person" is used in place of "Head of Household", which was used in the 1996 and previous censuses.
