3

Vital Statistics

- There were 20,300 marriages registered in 2003, the highest figure in 21 years.
- There were 61,500 births registered in 2003, the highest figure in 16 years.
- Males born in 2002 can expect to live 75.1 years and females 80.3 years.
- The percentage of births outside marriage rose slightly in 2003 and now stands at 31.4% of all births.
- There were 28,800 deaths registered in 2003. This corresponds to a rate of 7.2 per 1,000 population.
- The most popular babies' names in 2003 were Sean and Emma.

Introduction

This chapter contains statistics on births, deaths and marriages which are compiled by the Central Statistics Office on behalf of the Minister for Health and Children, in accordance with the provisions of Section 2 of the Births, Deaths and Marriages Registration Act, 1952. The chapter also contains figures on divorce, nullity and judicial separation applications, provided by the Courts Service.

Births

Tables 3.1, 3.2 and 3.8 contain information on births. The number of births was at its lowest in 1996, when 50,655 babies were born, and has risen more or less steadily since then. In 2003, there were 61,517 births – 31,414 male and 30,103 female. Almost two thirds of births, or 19,313, were outside marriage in 2003. This compares with 12,797 births outside marriage, just over a quarter of the total, in 1996.

The average age of unmarried mothers is lower than for married mothers. Half of births outside marriage are to mothers aged under 25; there were 8,878 births to mothers in this age category in 2003.

The most popular babies' names in 2003 were Sean and Emma, respectively, for boys and girls. The top five names for boys remained the same as the previous year, although the order changed slightly, while for girls, Katie replaced Chloe in the top five.

The total period fertility rate (TPFR), in table 3.9, estimates the number of children who would be born to each female over her lifetime on the basis of current birth patterns. This is an indicator of generation replacement. Even with the recent rise in births, the TPFR remains below the replacement level of 2.1 for the last decade and stands at 1.98 in 2003. This contrasts with previous decades when fertility was much higher – the TPFR was 3.76 in 1960, 3.87 in 1970, 3.23 in 1980 and 2.12 in 1990.

Deaths

Tables 3.1 to 3.7 contain information on deaths. A total of 28,823 deaths were registered in 2003, giving a mortality rate of 7.2 per 1,000 population. The death rate for males was 7.5 per 1,000 population and for females 7.0 per 1,000 population. The most common causes of deaths were diseases of the circulatory system (10,984 deaths), malignant neoplasms (7,568) and diseases of the respiratory system (4,428). Injury and poisoning accounted for 1,355 deaths. There were 444 deaths due to suicide and 293 due to motor vehicle accidents.

Life Expectancy

As a result of long-term falls in mortality, people are living longer. Table 3.12 shows the life expectancy figures since 1926 and table 3.13 contains

projections up to 2031. A baby boy or girl born in 1926 could expect, on the basis of the mortality figures at that time, to live on average to about 57 years. The exact figures were 57.4 years for boys and 57.9 years for girls. By contrast, the estimated life expectancy for people born in 2002 is 75.1 years for boys and 80.3 years for girls. Assuming that similar trends continue into the future, male life expectancy in Ireland may be approaching 78 years by the year 2030 and female life expectancy should be about 84 years.

Marriages

Tables 3.1, 3.2, 3.10 and 3.11 give information on marriages. There were 20,302 marriages registered in 2003, compared with 20,047 in 2002. The figures for 2002 and 2003 were considerably above 1996, when there were 16,174 marriages. Nevertheless, the number of marriages per year is considerably below the peak levels recorded in the 1970s. Throughout that decade, the annual number of marriages exceeded 20,000 with the highest annual figure, of 22,833, recorded in 1974. The number of marriages subsequently fell from 21,792 in 1980 to 18,174 in 1989 and the trend continued downward until the mid-1990s.

While the majority of marriages are celebrated according to Roman Catholic rites, the share of civil marriages in the total is increasing. In 1970, there were 121 civil marriages, accounting for about half a percent of the total. By 1980, this had risen to 388 civil marriages (1.8%) and in 1990, 656 (or 3.7%). In 1996, the latest year for which this breakdown is available, there were 928 civil marriages, representing 5.7% of the total.

Divorces

Tables 3.14 and 3.15 give information on divorce applications under the Divorce Act, 1996. In 1997, the first year in which the legislation operated, there were 95 divorces granted. The number of divorces granted increased to 1,421 in 1998, 2,333 in 1999, 2,740 in 2000, 2,838 in 2001 and decreased to 2,591 in 2002. There were 2,970 divorces granted in 2003.

Reference period for Vital Statistics

The figures on births and deaths relate to those which occurred in the relevant years up to 2001 inclusive. Figures for 2002 and 2003 relate to births and deaths registered in those years.

The figures for marriages relate to year of registration. Due to delays in the provision of information from the registration system, some details of marriages are only currently available up to 1996.

Total Period Fertility Rate (TPFR)

The Total Period Fertility Rate (TPFR) is derived from the age-specific fertility rates in the current year. It represents the projected number of children a woman would have if she experienced the current age-specific fertility rates while progressing from age 15 to 49 years. A value of 2.1 is generally taken to be the level at which the population would replace itself in the long run, ignoring migration.

Life Expectancy

Life expectancy estimates are calculated using mortality data for the three year period around a Census year. The most recent estimates refer to 2001-2003. The projected life expectancy figures up to 2031 are taken from the CSO's Population and Labour Force Projections.
